**CASCOPHEN**
A Resorcinoformaldehyde Adhesive capable of curing at room temperature and providing strong, durable, waterproof bonds. Comes in two parts, a liquid resin (part A) and a powdered catalyst (part B). The liquid resin is an alcohol-water solution of a partially condensed resorcinol-formaldehyde resin containing a suitable reinforcing cellulosic filler. The hardener is a tan powder formulated from parafomaldehyde and a suitable cellulosic filler. Produces a cured glue line which is resistant to fresh water or salt water, most acids and organic solvents, and lubricating oils and greases. **$23.50**

**FASTWELD 10 A/B HIGH SETTING EPOXY**
Fastweld 10 A/B epoxy adhesive is a rapid-setting, two-component paste curing in a convenient one-to-one mixing ratio by volume or weight. Fastweld 10 A/B epoxy adhesive produces strong bonds in a very short period. It is especially suited for bonding small parts and for repair work. Pot life: 3-4 minutes at 77°F; Cure time: 4 hours. Shelf life: 3 years. **$22.90**

**HYSOL EA-9430 GLUE**
This new and improved Hysol glue replaces the old EA-9410-2 glue. EA-9430 has the same characteristics as the EA-9410, but has a 50 minute pot life instead of the 30 minute pot life of the EA-9410 at 77°F. Used extensively in the Strojnik S2A sailplane in just one minute to provide fast repairs to almost any structure. 2 oz. kit. **$17.75**

**T-88 STRUCTURAL ADHESIVE**
T-88 is a nonbrittle structural adhesive which gives superior finished results even when used under adverse working conditions. T-88 will cure in temperatures as low as 35°F which makes it an excellent choice for homebuilders living in colder climates. It is recommended by the builders of many types of home-built aircraft and is excellent for bonding aluminum, steel or wood. When fully cured, it is not affected by water, oil, gasoline and most other chemicals. **$25.50**

**REDI-MIX MIXER TUBE**
The static mixer tube attaches to the cartridge with a retaining nut which screws on securely to the REDIMIX gun. The mixer tip tapers to 1/8" but may be cut back to about 1/4" so very small quantities of epoxy may be prepared in this manner without any waste or added cost. **$2.60**

**QUIK FIX EPOXY PUTTY STICKS**
Quikfix BC 101 is a hand mixable, fast curing, general purpose epoxy putty stick that mixes in just one minute to provide fast repairs to most surfaces including metals, wood, glass, concrete, ceramics and numerous plastics. One hour after mixing, Quikfix BC 101 can be sanded, sanded, tacked, machined, or painted. Color: Gray. **$47.50**

**BOND-AIDE WOOD EPOXY PUTTY**
Bond-Aide P-1500W is a wood epoxy putty compound that cures in minutes to form permanent repairs on woods, plaster, ceramics and many plastics with no shrinkage. Excellent for bonding wood to wood, wood to metal, and wood to glass or ceramics. **$14.75/ea**

**G/FLEX EPOXY ADHESIVE**
A toughened, versatile, liquid epoxy for permanent waterproof bonding of fiberglass, ceramics, metals, plastics, damp and difficult-to-bond woods. Modulus of elasticity of 150,000 psi. Can absorb temperature of expansion, contraction, shock and vibration. Can be modified with West System fillers and additives, and used to wet-out fiberglass tapes and fabrics. **$20.19**

**T-88 UNIVERSAL CARTRIDGES**
With the Universal Cartridge any medium to high quality caulking gun will work just fine. When you evaluate the Universal Cartridge notice that it is perfect for accurately measuring small batches of adhesive. This is something that is very hard to do in a mixing cup without generating a lot of waste. Of course when the cartridge is used with the mixing tip you get both accurate measuring and thorough mixing making large, continuous gluing jobs much easier with flawless products. **$109.80**

**REDI-MIX MIXER TUBE**
The static mixer tube attaches to the cartridge with a retaining nut which screws on securely to the REDIMIX gun. The mixer tip tapers to 1/8" but may be cut back to about 1/4" so very small quantities of epoxy may be prepared in this manner without any waste or added cost. **$2.60**

**FPL-16A HUGUES GLUE**
This is an exceptionally fine two-part white epoxy glue for homebuilt and experimental aircraft. It is based on a formula developed by Forest Products Laboratories. It is excellent not only for wood but for many other applications such as a metal to wood adhesive, metal to metal, just about anything with the exception of some plastics. **$21.50**

**WEST SYSTEM SIX10 THICKENED EPOXY ADHESIVE**
Six10 Adhesive gives you the strength and reliability of a two-part WEST SYSTEM epoxy with the convenience of a single part product. Six10 is dispensed with a standard caulking gun. Non-sagging Six10 bonds tenaciously to a single part product. Six10 is dispensed with a standard caulking gun. Non-sagging Six10 bonds tenaciously to many plastics with no shrinkage. Excellent for bonding wood to wood, wood to metal, and wood to glass or ceramics. **$87.75**

**WELDWOOD GLUE**

**SCOTCH WELD 3M™ STRUCTURAL ADHESIVE**
Commonly known as “Scotch Weld”, this two part epoxy structural adhesive will bond wood, metal, plastics and rubber. It has a pot life of nearly 2 hours after mixing, and a 24 month shelf life. Forms flexible yet very strong bonds. **$61.50**

**EPOXY ADHESIVE**
P/N 02-00036 **$23.50**
P/N 02-00037 **$33.85**
P/N 02-00038 **$14.75**

**REDI-MIX MIXER TUBE**
The static mixer tube attaches to the cartridge with a retaining nut which screws on securely to the REDIMIX gun. The mixer tip tapers to 1/8" but may be cut back to about 1/4" so very small quantities of epoxy may be prepared in this manner without any waste or added cost. **$2.60**
