BONANZA NOSE GEAR BRACE

These PMA approved replacements for the Nose Gear Brace are used in early Bonanzas. Most of these aircraft have severely corroded nose gear braces as a result of lightening holes that allow moisture to enter and collect in the bottom of the housing. Even dry country aircraft are found to have corrosion. This is because many of these aircraft have been repainted and paint remover has entered the housing and is reactivated when water enters the housing during aircraft washing. Applicability: Model 35 D-1 thru D6561 Model 33 CD-1 thru CD-370 Old unit (core) must be returned. FEATURES: FAA/ PMA Approved direct replacement part. • One piece aluminum stronger than OEM part. • Durable corrosion resistant white powder coated finish. • Completely permanent, direct replacement for the original equipment. • One piece aluminum stronger than OEM part. • Durable corrosion resistant white powder coated finish.

TRIKSLIDE DUAL THROTTLE/CHOKE CONTROL

The DCT-01 has adjustable holding friction, that will keep the pull rod at the last set position. The DCT-01 has dual cable adjusters to synchronize the choke/throttle levers. The DCT-01 can be held to the airframe with the supplied clamp, or it can be bolted to the instrument panel.
- P/N 05-02492 ............................. $69.95

TRIKSLIDE DUAL THROTTLE MIXER

Trikslide is a dual throttle input-mixer/slider designed especially for trikes and ultralight aircraft. Trikslide eliminates the interaction between two throttle cables. It will mount on any round or square structural member and provides smooth sliding action with a full 270-degree range. Features aluminum and delrin construction with universal mounting clamps and a universal control cable connector which will fit all cable terminations. P/N 05-00782 ............................. $59.95

DUAL CARBURETOR SPLITTER

Splits a single throttle input into two outputs for dual carburetor installations. Clamp mounting.
