When ordering, specify aircraft, serial number, N number, paint name and number (additional spares, Loctite Depend adhesive and all the materials needed for the easy one-day installation.

Micro Vortex Generators from Micro Aerodynamics, Inc. are available for a wide range of aircraft and can reduce stall speed, improve aileron response, improve cross wind control, and reduce landing and takeoff roll. The kits consist of vortex generators mounted on the wings, full-span elevator authority and improve controllability. 10-04227 $150.

When ordering, specify aircraft, serial number, N number, paint name and number (additional spares, Loctite Depend adhesive and all the materials needed for the easy one-day installation.
