POLYURETHANE/CATALYST CURE: Low VOC - Two component topcoat system with built-in U.V. protection.

The system has both corrosion and chemical resistance properties with a gloss range > 95%. Comes in all Federal 595C colors. Custom colors available upon request.

This product is a high quality alkyd enamel which performs and curing times.

Note: Polyurethane requires catalyst and the system will add the information, see www.aircraftspruce.com.

ENAMEL: PTI’s Enamel is formulated to meet the performance specifications of Federal specification TT-E-489G. This product is a high quality alkyd enamel which performs best when used with PTI’s zinc or chrome-free primer. It may be applied over wood or metal and is suitable for both interior and exterior applications.

WATERBORNE POLYURETHANE: ZERO V.O.C. general purpose, exterior protective coating for metal surfaces. This product also works great for interior applications. The Waterborne Polyurethane should be applied over top of the PTI Waterborne Epoxy Primer. Available in all Federal 595C colors; custom colors available upon request.

HOW TO ORDER:

Add the following dash numbers after the “Base Part No.” listed in the chart for the size and type desired.

For PTI Polyurethane:
- Qt. Size add -13
- Gal. Size add -14

For PTI Enamel:
- Qt. Size add -23
- Gal. Size add -24

For PTI Waterborne:
- Qt. Size add -33
- Gal. Size add -34

The PTI Waterborne, Enamel, and Waterborne paints are also available in semi-gloss and flat. Please contact us for current size and price availability.

PTI Touch-Up Paint Kits are available in polyurethane, enamel, waterborne, and interior epoxy paints. For more information, see www.aircraftspruce.com.

PTI POLYKICK™

Other products used with: Use only with PTI Polyurethanes. Typical Uses: PTI Polykick is formulated to accelerate the cure time for PTI’s polyurethane formulations.

4 oz. P/N 09-02670 $10.50
8 oz. P/N 09-02671 $15.95
