NuGlaze Super Paint Glosser

NuVite introduces NuGlaze to create a super high gloss “show quality” finish for paint in new or excellent condition, and it adds a U/V and sealant protection. It will put that final “wet-look” finish on good paint, and can be used as a slight gloss after using a dry sponge cleaner/polish such as NuVite NuPower II. With regular NuGlaze use, a continuing surface barrier against most of the effects of airborne chemicals and ultraviolet radiation is created. Paint can be maintained in “new” condition longer and maintain the color balance intended by the manufacturer with regular use. Bugs and normal soil remove easily from a NuGlaze surface, and the added gloss keeps the “new paint” look longer. NuGlaze is simple to use and avoids complicated setups and special application or buffing equipment. Proven techniques and continuing technology advancement from NuVite have come together to produce NuGlaze - the best thing you can do to maintain and protect your near-new or “new-looking” paint.

NuVite Citri-Cut Cleaner

NuVite CitriCut is a citrus based airframe wetwash and wipe-down cleaner. Pleasant citrus smelling wet wash or wipe down cleaner that is especially friendly to the environment. Works great for standard wet washing with mops or scrub pads. When used as a wet wash, water sheets off, minimizing water spotting. CitriCut is also handy for hand debugging or hand wipe down without need for rinse -so there is no need for water or floor cleanup. Spray CitriCut at 1:8 hand trigger sprayer for hand debugging or wipe down, and wipe with Terry towel until clean. Use a clean towel to buff up surface shine. No need to rinse surface. Supplied as concentrate—use 1:8 for hand wipe down or 1:16 in wet wash water.

Nuvite Polishing System

Nuvite’s surface finish enhancement and protection technology offers the highest-performance surface maintenance and protection systems available. These products are designed to be used on your aircraft, boat, recreational vehicle, truck, auto or other vehicle anywhere, anytime. Nuvite has the answer for your operations in an EPA-sensitive environment.

Nupol Polish / Restorer / UV Protectant

Same easy wipe on, let dry, wipe off surface cleaner with enhanced cleaning and oxidation removal capabilities. Ideal for tough cleaning due to the intervals between cleanings. Leaves a beautiful shine and an effective UV protective barrier.

Grade G6 (SS & titanium or heavily oxidized aluminum) - When a heavy cut of the surface is needed, G6 may be a good answer. G6 has a high-tech abrasive system that is designed to do a quick, aggressive cut, and immediately break down to a finer cut, similar to Grade C. Use when there is heavy oxidation on the surface of aluminum, or even when very light corrosion is evident. Can also be used to clean bare metal surfaces. Apply with mop, spun cotton pad, or by hand. Agitate firmly over area to be cleaned. Material will remain on the surface of the material to offer the ability to produce cutting action when needed, yet offer micron-level finishing in the finer grades that produces highest reflectance and image excellence.

Grade S (for final finishes) - The finishing grade that gives the really deep, clear image when used as a final finish over a properly prepared, oxidation-free surface.

Grade S (for final finishes) - The finishing grade that gives the really deep, clear image when used as a final finish over a properly prepared, oxidation-free surface.

Nushine II Polish / System

NuVite engineers have formulated a system of polishes to meet the needs for almost any metal and paint polishing project. New metal to antique, the formulations in the NuShine II Polishing System will give superior definition, highlights, imagery, clarity, and will retain the finish longer than normal polishes. NuVite’s NuShine II graded polishes use high technology materials with programmed abrasive characteristics and are blended with superior carriers to offer the ability to produce cutting action when needed, yet offer micron-level finishing in the finer grades that produces highest reflectance and image excellence.

Nupower II Polish / UV Protectant

Dry Wash Cleaner and Polish (Routine dry wash cleaning with gloss enhancement and UV protective barrier) - Use for routine cleaning where wetwashing is not possible or gloss enhancement is desired. Contains non-abrasive media to remove even stubborn soilings. Cleans dirt, carbon and oil and leaves a protective barrier against UV deterioration of paint. Can also be used to clean bare metal surfaces. Apply with mop, spun cotton pad, or by hand. Agitate firmly over area to be cleaned. Material will remain on the surface of the material to offer the ability to produce cutting action when needed, yet offer micron-level finishing in the finer grades that produces highest reflectance and image excellence.

Grade S (for final finishes) - The finishing grade that gives the really deep, clear image when used as a final finish over a properly prepared, oxidation-free surface.

Nushine II Polish Systems

Polishes for both metal and paint finishing that will provide the finest surface finish available. Has been shown to outperform all other aviation, automotive and marine polishes in side-by-side testing by users throughout the world. Affords the operator the choice to select the grade of polish to match the needs of the surface to be polished, be it brand new, oxidized in use, or with atmospheric corrosion. NuShine II not only polishes paints and metals to an incredibly deep, clear and image-reflecting surface, but also imparts a protective chemical barrier to inhibit corrosive oxidation to the metal.

Nuvite’s surface finish enhancement and protection technology offers the highest-performance surface maintenance and protection systems available. These products are designed to be used on your aircraft, boat, recreational vehicle, truck, auto or other vehicle anywhere, anytime. Nuvite has the answer for your operations in an EPA-sensitive environment.
