EzcLear AIl-SPray Detailers

The All-Spray Detailer packages All-Spray cleaner and a disposable Microfiber Towel into a portable Wet/Dry combo pack. This on-the-go Detailer is designed for a quick, single-time aircraft window cleaning application. Store these window detailers in the back of the aircraft or in the glove box. The Detailer measures 3.25” x 4.5” when folded in half. A package of 10 makes a great gift.

EzcLear AIl-SPray Cleaning and Detailing GA Aircraft Windows

Detailer’s All-Spray is an aviation grade, anti-static detailing spray that will quickly restore a brilliant luster to acrylic surfaces. All-spray is ideal for cleaning aircraft windows, instrument panels, landing light and navigational lenses. It is also great for cleaning plastic, boat windows, convertible windows, helmet shields, motorcycle windshields, CD’s, aquariums, skylights, displays, and other Plexiglas, Lexan, Acrylote and Lucite plastic surfaces.

32 oz. P/N 09-02379 $29.50

EzcLear Instrument Panel Clean Kit

This product meets Garmin G1000 Pilot Guide specs for cleaning and is safe to use on glass panel. EZCLeaR Instrument Cleaning provides a safe, effective way to remove fingerprints and dust from glass panels, instruments and more. The kit contains three EZCLeaR Cleaning Packs and one Polishing Cloth; these items have been specifically paired together to ensure safe and effective screen cleaning. Per the instructions, the user wipes the surface with the Cleaning Pack and then dries the area with the Polishing Cloth. The Cleaning Packs are ammonia free, aviation-grade and will not remove or damage any anti-reflective coating. The Polishing Cloth is washable. This kit will last between 3-4 months depending upon frequency of use.

P/N 09-02394 $14.85

EzcLear Window Polish Kit

Complete kitted solution. Used to restore aviation grade acrylic transparent surfaces such as an acrylic aircraft window, transparency, navigational or landing light lens. Removing major and minor haze or scratches) or minor damage and restores clarity to 99.7%. Leaves clear, distortion free finish. Enough for 1-3 applications (4 sq ft), depending upon damage. Re-stockable EZCLeaR replenishment products available.

NOTE: The Ezclear Starter Demo Kit contains an Ezclear 5” Backing Plate (PN 09-03701). If purchasing the Repair Pack you need to order the backing plate separately.

P/N 09-03693 $299.99

Repair Pack Contents: 3 - Major Restoration Polish/Disc (10CC + 5” White Disc) 1 - Minor Restoration Polish/Pad (2 FL OZ + 5” White Pad) 1 - Finishing Restoration Polish/Pad (2 FL OZ + 5” Red Pad) 1 - Preparation Spray (16 FL OZ + Trigger Sprayer)

P/N 09-03694 $88.50

5” Backing Plate P/N 09-03701 $29.85

Nanocloak™ Nano Membrane

Nanocloak™ is a wonder of nano coating membrane technology, providing ultimate UV degla- tion protection and amazing self-cleaning properties. Applicable to most Aovo lights in aerospace, marine, transportation, and safety. It is also used for not only these features but anti-microbial and anti-fungus/mold performance characteristics to make lighting in hospitals and schools etc. germ free. Features: Waterproofing, UV-proof, Anti-mi-crobial, Self-cleaning, Anti-graffiti, and Diirproof.

P/N 11-12322 $119.00

Rid Odor Sport

Rid Odor Sport is a product that nearly every owner of a Single Engine/Multi Engine both pressurized and non-pressurized need! Why? Because there are two things that nearly every aircraft owner fights, whether they hangar their aircraft or tied down. Moisture and Bacteria are the two major reasons why cabin spaces have terrible problems with “Odors”.

Rid Odor Sport is chemically engineered and designed to be attracted to ALL Malodor molecules and the reasons for them being there. Everything that is organic is surrounded by atoms. All atoms have one thing singularly in common and that is that they are oriented with a positive (+) charged molecules. Rid Odor Sport is designed so that the each molecule inside our formula is constructed with a negative (-) charged molecule. When Rid Odor Sport is pumped sprayed into the vicinity of all of the “Malodor Molecules (+)”, the Rid Odor Sport Molecules (-) are attracted and drawn in by Malodor molecules. Once they collide, the product or molecule bonds to the malodor and destroys the malodor molecule. Unlike other products that just mask over the odor, Rid Odor destroys the malodor and leaves the inside of the cabin smelling like new!

2 oz. Pump Spray P/N 09-02609 $7.95

8 oz. Trigger Spray P/N 09-02610 $12.75

Aerokroil Penetrating Oil

Corrosion, compression, chemical reactions, thermal variations, and electrical interrelationships are the primary factors which contribute in varying degrees to frozen metal parts. For example, in some instances, loosening a frozen metal part requires that the molecular bond of oxidation be broken at the first molecular level. This requires that a chemical bond be broken in an often-inaccessible location that literally exists in infinitely small spaces.

Based on a unique proprietary formula and manufacturing process, Kano created a molecule which had an inherent means of expedient self propulsion which would penetrate into spaces which are immeasurably small.

In the lab, it was nicknamed Creeping Oil, Kreeping Oil, and finally Kroil. To these penetrating properties were added the ability to disrupt the existing corrosive bond while remaining chemically inert and neutral to the base metal. Since not all frozen parts are caused by corrosion, additional research has provided for the inclusion of other molecular properties assuring that the final molecular architecture would be also capable of loosening frozen metal parts when other factors such as corrosion were more responsible for the problem. The result is Kroil, the world’s largest selling penetrating oil.

Guaranteed to penetrate, lubricate, and loosen frozen metal parts or it costs you nothing! 13 oz Aerosol P/N 09-02665 $17.95

16.5 oz Aerosol P/N 09-03022 $21.50

Nanocloak™ Degreaser

Hydrophobic and oleophobic polymer protection of plastics, polycarbonates, plastic, painted surfaces, ceramics, glazed surfaces and surfaces with plastic coating.

POLYMEMBRAN PLAST is innovative polymer protection of plastics, polycarbonates, plexiglass and composite plastic materials. The system of polymeric membranes creates an ultra-thin invisible layer with long lifetime on the surface. This layer significantly increases the surface tenacity. Thanks to this property, the surface is highly hydrophobic and resilient to impurities, grease, oils, mineral impurities and limescale. It is also an excellent prevention against establishment and growth of bacteria, mold, fungi and algae. Thanks to partial self-cleaning effect, the surface can be cleaned with only water or a wet cloth without using cleaning chemicals. This significantly reduce maintenance cost and time!

The product finds applications in various sectors such as construction and healthcare as protection of window frames, handles, worktops, skylights, plastic chairs, tables, shower stalls, bathtubs and more. In engineering as protection of sensors, detectors. In aqua parks as protection against establishment of dirt on the pool walls, glass, mirrors etc.
