BULBS FOR AIRPATH COMPASSES
14V ........................................ $$1.25 ea 28V ................................... $$0.88 ea

AIRPATH COMPASS REPAIR KITS
Kit consists of diaphragm, 1/2pt of compass fluid & face glass gasket.
Repair Kit with Fluid ...................................................... $17.85
Repair Kit (without fluid) .................................................. $16.50
Compass Fluid: 1/2 Pint .............................................. $1.70
Quart ................................................................. $5.50
Airpath Compass Deviation Card Holder ................................ $1.56
Deviation Card ............................................................... $1.65
CB21-914H - Inner gasket .............................................. $7.50
C21-915G Spacer gasket .................................................. $1.95
Diaphragm Only .............................................................. $6.50
Glass Compass Lens for C2300/C2400 series compasses ...................................... $18.50

ECONOMY COMPASS SEAL KITS
Kit without fluid - includes: (2) Gaskets, (1) Deviation Card, (1) Diaphragm Card, (1) Diaphragm, (1) 1/2 pint Compass Fluid ....................................................... $9.75

C2400 SERIES COMPASS HOUSINGS
C24-730A Housing for C2400LAP Top Panel Mount .................................................. $25.50
C24-727A Housing for C2400L4T Windshield Mount. ................................................ $29.85
C2400 W/R INNER CASE - This is inner case compass only.
Design fit Airpath 2-1/4" as replacement only (for models C2400-L4T, C2400L4P). .................................................. $98.75

FALCON AIRCRAFT COMPASSES
These compasses are very similar to the Airpath C2300 & C2400 style compasses above but are priced more economically. New manufacture. Not certified.

PRECISION VERTICAL CARD COMPASS
The Precision Vertical Card Compass is a totally new concept for today’s aircraft. It is a dry compass, designed to replace the float/liquid type compass; no more leaking fluid or backward azimuth readings. It uses eddy current damping and as such has no overshoot. It consists of a 2-1/2" rotating dial which is combined with miniature airplane (rubber line) to present the magnetic heading of the aircraft at all times. Heading information is more natural because the heading is read at the 12 o’clock position and off the nose of the miniature aircraft. The compass card rotates and presents all quadrants in their true relation to line of flight. Requires no power (except for lighting) to operate. Fully TSO’d. Installed in many current production aircraft and helicopters. Size: 2-7/8” x 2-3/8” W x 2-1/8” H. We 0.6 lb. After installation, compass must be compensated using standard compensation procedures. Also used in sailplanes. Bracket / mount is required for installation and is not included with unit.
Northern Hemisphere 14V .............................................. P/N 10-00421 $299.95
Northern Hemisphere 28V .............................................. P/N 10-00423 $299.95
Southern Hemisphere 14V .............................................. P/N 10-00422 $306.00
Southern Hemisphere 28V .............................................. P/N 10-00424 $309.00

REPLACEMENT LIGHT BARS FOR PAI-700
14V ...................................................... P/N 10-00092 $31.65
28V ...................................................... P/N 10-00093 $31.65
5V Light Assy .................................................. P/N 10-02956 $31.50

PRECISION COMPASS MOUNTS
PACMG-2 – Universal mount for many aircraft using a glare shield or deck mount. Models include Beech Baron and Bonanza, Cessna Skyhawk, Skylane and Cardinal. .......................................................... $26.50
PACMO-U – Universal overhead bracket for customer adaptation. .................................................. $27.50
PACMO-CESNO – Custom mount for several Cessna models using one-piece windshield & compass mounting block. Models include Cessna 150,152,170,180,182,185 & 210 .................................................. $44.50
PACMO-PIPER – Custom mount for several Piper models with 8½’’ horizontal windshield post. Models include Piper Cherokee, Warrior, Arrow, Archer, Lance, Comanche, Navajo & Cherokee Six. .................................................. $43.50

pacmo-apz21 – Custom mount for use in Piper Apache, Aztec, & Cessna 421. .................................................. $43.50
PACMO-SRN – Custom mount for use in Beech Sierra using windshield mount. .................................................. $44.50
PACMO-KA – Beech King Air .................................................. $44.65
PACMO-EB – Early Bellanca. Compass mounted overhead. .................................................. $49.99
PACMO-LB – Late Bellanca. Compass mounted on windshield. .................................................. $43.65
PACMO-2CN – Cessna early 172, 182 with compass mounted on windshield with 1” center 1” divider strip. .................................................. $45.75
PACMO-2400 – Cessna 240N Twin .................................................. $54.75
PACMO-301R – Cessna 301 Twin .................................................. $54.85
PACMO-GTR – Grumman Tiger, Cheetah .................................................. $45.50
PACMO-MHN – Mooney compass mounted on housing center post .................................................. $44.50
PACMO-HMN – Mooney compass mounted on center post with horizontal screws. .................................................. $49.95
PACMO-VMN – Mooney compass mounted on center post with vertical screws. .................................................. $49.95
PACMO-PCN – Comanche with no center post use PACMG-2 in twin, SE. .................................................. $43.65
PACMO-R22 – Robinson R22 .................................................. $49.85
PACMO-R44 – Robinson R44 .................................................. $49.85
PACMO-RV6 – RV6 kit. (Sliding Canopy only, not tip-up) .................................................. $51.75
PACMO-HSNS3A – 32.50-40.63 Schweizer 300 & 300 CB. .................................................. $50.50
PACMO-3/4P – w/ a 3/4” post .................................................. $61.85
PACMO-5/8P – w/ a 5/8” post .................................................. $49.50
PACMO-5/8-RP – w/ a 5/8” post .................................................. $47.80
PACMO-APC – Ercoupe .................................................. $50.50

COMPASS COMPENSATOR
Very sensitive to stray magnetic fields within the aircraft. If the compensators of the compass will not bring the compass within tolerances, it will be necessary to install the PBB475 compensator (“balanced balls”). These ball contain magnets which permit the compass to be properly compensated. Instructions furnished. .................................................. $46.85

MAGNETIC COMPASS SHIELD
Use this .005” x 5” x 12” metal strip to shield the precision PAI-700 compass from magnetic interference in the instrument panel. .................................................. $21.65

NON-MAGNETIC SCREWDRIVER FOR COMPASSES
This small non-magnetic screwdriver blade is ideal for adjusting this magnetic blades. This blade is durable, corrosion resistant, & can be put on a key chain until needed. .................................................. $7.50
