WESTACH ROTOR TACH

For the rotocraft pilot, the rotor tachometer is a valuable aid to safe flight. Utilize a state-of-the-art Hall-effect sensor to accurately gauge rotor RPM based on the rotational positions of a series of magnets which are easily mounted on the rotor shaft or hub. Sensor and magnets are supplied with the gauge along with complete assembly instructions. 12 volt DC power required. Square style, 2 1/4" inch.
P/N 10-01290...............................$114.50
P/N 10-01291...............................$119.75

WESTACH LOW POWER ADAPTER

For those instruments requiring 12V DC, this low output regulator/rectifier provides sufficient power to operate up to 2 WESTACH instruments. Converts lighting coil AC to 12V DC. Includes instructions, wiring harness.
P/N 329-LPA............................$33.95

WESTACH SENDER 720-14RB

Proximity sensor, Hall effect sender for Bendix mag.
9/16-24 thd. 5-12 VDC. Weight: 7 ounces
P/N 10-00863...............................$71.90

WESTACH EXTENSION LEADS

Complete extension leads, with connector terminals, for extending CHT or EGT leads up to Complete extension leads, with connector terminals, for extending CHT or EGT leads up to 10 ft. with or without affecting accuracy. Longer lengths give low reading, requiring recalibration of instrument.
