SHIELDED TEFZEL WIRE
This hook-up wire is standard in the aviation industry for installation of electronics equipment. Sold in 1’ increments and spooled as a continuous length.

4 CONDUCTOR UNSHIELDED WIRE 18 AWG
The cable can be cut to length, jacket removed and conductors stripped to custom specifications. AWG Size: 18 Thickness: .016" Nominal OD: .032" Suitable for EIA RS-232 Applications P/N 11-00280 $1.74/ft.

SOLDERING SLEEVES
One-step, heat-shrinkable wire and cable interconnection device. Create strong, soldered connections. Consist of a heat-shrinkable sleeve and a premeasured, fluxed solder band. When heated, the tubing shrinks and the solder melts, making reliable, insulated terminations.

SOLDERING SLEEVES
Termination sleeves consist of a heat-shrinkable, transparent, polyvinylidene fluoride sleeve with an inner, pre-fluxed, solder preform and two thermoplastic sealing inserts. When heat is applied, the solder melts and flows to provide a superior connection between the ground lead and the shield. At the same time, the two thermoplastic sealing inserts melt and the outer sleeve shrinks to provide an environmentally protected termination.

HEAT SHRINK BUTT SPLICES
Heat-shrinkable crimp butt splices completely insulate and protect electrical connections from water, condensation, salt and corrosion. Provides strain relief and protects against wire pull-out and vibration in the most rugged environments. Qualified to MIL-S-81824/1.
