PILOT USA SMARTPHONE DIGITAL AUDIO ADAPTER

Turn your Smartphone or Tablet (iPhone, iPad, Android, Windows Phone) into a Cockpit Voice Recorder! You'll be able to record audio through your aviation headset. Your Smartphone will be able to record all transmissions through the intercom systems including in-cabin and ATC transmissions. Great for CFI's and students to review radio communication skills after the flight!

ANR HEADSET RETROFIT KIT

The ANR Adapter is a product that will transform a current aviation headset into a high-tech active noise reduction unit. The ANR Adapter comes as a kit and includes a pair of inserts that fit more than 20 different headset models. Installation requires fitting the inserts, drilling a small hole in one earcup for the power receptacle, and soldering the original cable leads to the kit replacement parts. (uses two 9-Volt batteries). IMPORTANT: It is mandatory that you use “silicone gel” type earseals. The original earseals (dry or liquid filled) are not as airtight as gel seals, and in addition do not dampen sound and vibration as effectively. The result is that the ANR units will greatly underperform (20-50%) and will be more likely to malfunction.

AMP CABLE (AUDIO+MIC+POWER)

A standard ANR upgrade kit comes with a 6’ long addon power cable which connects to your original audio cable, and it requires that you drill a 1/4” hole in the left earcup (next to where the main cable enters the cup). The AMP cable replaces your original cable and has the DC power wires, audio wires and mic wires in all 1 cable. The result is more esthetically pleasing and no additional hole is required in the left earcup.

PATCHCORD COCKPIT VOICE RECORDER

PatchCord has electronic circuitry specifically designed to enable direct hook-up between a 6002 headphone jack and the mic jack of tape recorders and / or most video cameras. The PatchCord has been designed to enable you to record on any tape recorder or video camera, both sides of all your radio communications and all mic equipped persons in the aircraft when used with intercom. If not equipped with intercom, PatchCord enables you to record both sides of all your radio communications if aircraft radio has sidetone. The most advantageous way to use PatchCord is with the intercom and voice actuated tape recorder.

Student Pilots: • Great learning aid • Playback of previously recorded tape enables students to review the entire flight lesson, whether it be ATC clearances or flight instruction • Great study aid for the FAA written test • Save recorded tapes of flight lessons as a momento of your student pilot experiences. Other Pilots: • Assist in studying for additional FAA ratings • Back up your memory and your notations by recording your IFR clearances • Record in-flight ATIS and weather reports, enabling you to play back and review in detail that part of your flight when you need to • Track your progress by recording tapes to improve your radio proficiency • Have your own tapes if you have a problem with ATC.

THE MUSE PERSONAL MUSIC DEVICE

PS Engineering, Inc’s The Muse*, as simple and low cost way of interfacing your favorite entertainment device into your aviation headset. The Muse* is a miniature Personal Music Device (PMD) that allows a connection of an entertainment source directly to your headset without complicated wiring or permanent installation—no rocket science here. About the size of a 9-Volt battery, The Muse* mates with stereo or mono headphones and has no effect on radio transmissions or intercom functions.

P/N 11-09045.......................... $349.95

IPOD / MP3 MUSIC ADAPTER

This adapter works with your existing intercom by pumping your music into any available mic jack, allowing it to be distributed through the intercom to everyone wearing a headset. Plug one end into the aircraft’s mic jack and the other into your media player’s headphone jack. * Compatible with ipod, iphone, mp3, CD, laptops, and most other portable media players * Music in your headset without costly upgrades

Listen to music through the aircraft’s speaker during pre-flight * Plugs into standard mic jack * Just Plug and Play! No more wearing uncomfortable in-ear headphones under your aviation headset. No need for an expensive new intercom or new headset. This will work in any intercom system with an available mic jack. Maintain the comfort and quiet of your current headset; just add your favorite music! Also works great in many airliners.
