**MICRO LATHE**

This is the machine you don’t have to “baby”.

The Micro Lathe is a rugged, precision instrument.

**General Specifications:**
- Overall working accuracy: 0.0005"  
- Max. bearing run out: 0.0004"  
- Headstock normality to bed: 0.0004" in max error  
- Max. taper bed dovetail over pins: 0.0010"  
- All machine dovetails: 45°  
- Bed width: 2 5/16"  
- Cross slide dial graduation: 0.001"  
- Cross slide screw: 1/4"-20  
- Length of carriage on ways: 3.000"  
- Width of cross slide on carriage: 2.075"  
- Length of carriage on ways: 3.000"  
- Width of cross slide on carriage: 2.075"  

**Spindle Specifications:**
- Spindle Hole: 0.343"  
- Spindle Head Rotation: 90°  
- Column Rotation: up to 180°  
- Column Rotation: 1/2"  
- Spindle Speeds: 525 to 5200 RPM  

**Maximum Spindle Speed:** 7000 RPM

**Column Diameter:** 1/2"  

**Overall Working Accuracy:** 0.0005"

**PLYWOOD PLANER-SCARFFER ATTACHMENT**

The Plywood Planer-Scarffer attachment enables you to make consistent scarf cuts quickly and easily. Easy installation and removal allows your planer to be readily used for scarfing as well as a regular planer. The Planer-Scarffer attachment is easily installed on the Makitan 1911B and the Porter Cable 9125 planers. The attachment is not limited to these particular models or makes. With the Planer-Scarffer attachment, you can purchase standard size sheets of plywood and then join them together. This saves the extra cost of larger sheets and the shipping charges that would be required. By scarfing 4x8 sheets together, save 60% or more in the price of the plywood and make the cost more bearable. The attachment is mounted on a power-planer and cuts an 8:1 bevel. 2 models are available. One fits a 4-3/8" planer for plywood up to 1/2". The other is designed for a 3-1/4" planer and can be used on plywood up to 3/8". Specify planer type when ordering.

**Part No.**
