FULLY RELEASING TORQUE DRIVER

The MD1F135 is an adjustable driver with a range of 5 to 35 lb. in. Body is constructed of steel and anodize aluminum, has a CNC machined knurled grip and 1/4" mandrel and comes packaged in a plastic box. The MD1F135 is a preset model ideal for repetitive assembly operations. P/N 12-00530 .......... $209.00

DIAL TYPE TORQUE WRENCH

Dial Type Wrenches provide unmatched reliability, accuracy and durability where torque measurement is extremely critical. Models feature a memory pointer that indicates the highest torque achieved during application of the driver. 2% accuracy clockwise and counter-clockwise. All wrenches are made in the USA of all steel construction for the highest quality. Both models come with a plastic storage box and a calibration compliance certificate.

3/8" sq.dr. / 300 lb.in. P/N 12-00531 .......... $199.95
3/8" sq.dr. / 600 lb.in.-50 lb. ft. P/N 12-00532 .......... $199.95

MICROMETER ADJUSTABLE CLICK WRENCH

Engineered, precision bearing surfaces extend the calibrated life of these micrometer torque wrenches to as many as 60,000 cycles or more and ensure the most reliable performance possible. In addition to flawlessness at release, calibration is completely external, unlike traditional mechanisms that require disassembly and replacement of blocks and shims. Both models come with a plastic storage box and a calibration compliance certificate.

3/8" sq.dr. / 40-200 lbs. In. P/N 12-00533 ........... $197.00
3/8" sq.dr. / 20-100 lbs. In. P/N 12-00534 ........... $197.00

TWISTED STRIPPER TWISTED SHIELDED PAIR WIRE PREPARATION TOOL

STP Wire Stripping Problem Background: From the beginning, Mil-Spec Tefzel Shielded Twisted Pair wire has defied every wire stripper available to installers, leaving a razor blade or knife as the best option for removing the outer jacket. This time consuming method is imprecise, and it can easily lead to internal shorts between the center conductors and the shield, especially when solder sleeves are used for shield termination. With the increased use of RS-232, ARINC 429, and other types of data busses in today's aircraft electronics, this type of wire is now a major component of many avionics installations. Stop the Razor's Hidden Damage Ring and slit. That has been the standard way to remove twisted pair jackets since the introduction of this type of wire. This time consuming and inaccurate process has obvious disadvantages when compared to the TS-7000:

P/N 12-02931 .......... $329.00

QUICK-GRAB RATCHET-ACTION WRENCHES

You'll have the advantages of an open-end wrench, plus the convenience of ratchet action. The jaws snap open to slip onto fittings and fasteners; then, they close tightly for ratcheting. Wrenches require a 30 degree handle swing to turn a fastener. All are made of hardened steel with a black finish.

Size   Part No.   Price
5/8 Inch 12-02913 $33.50
3/8 Inch 12-02923 $26.50
1/2 Inch 12-02939 $26.50
9/16 Inch 12-02940 $32.50

ADJUSTABLE TORQUE SCREWDRIVER

Bi-directional Accuracy of +/- 6% Indicated Value from 20% to 100% of capacity meets or exceeds ASME B107.300-2010 and ISO 6789. Incredibly durable; many owners have experienced a service life of 10+ years! Operator cannot overtorque. Clutch releases automatically when desired torque has been achieved. Scale on shaft is marked in dual incrementation (in. lbs. and NM) on Cal 36/4, kgf•cm on CAL 40. Magnifying lens improves view of clearly engraved scale. To operate, simply dial torque setting and insert bit. Uses standard bits, adapters and sockets. Anti-backlash design enhances repeatability. Comes with FREE certificate of calibration from our ISO/IEC 17025 Accredited Calibration Laboratory. CAL 36/4 can be ordered with certification for English or SI units of measure.

P/N 12-03398 .......... $242.95

MICROMETER TYPE TORQUE WRENCH

The wrench is equipped with a reversible ratchet head or plain (non-ratcheting) head may be used in both right or left hand directions. The drive head accommodates sockets, extensions, crow-foot adapters, and other attachments to fit a multitude of fasteners both in English and Metric.

P/N 15-05531 .......... $147.80

MICROMETER ADJUSTABLE TORE WRENCHES

Note: Must be used with part numbers 12-03404 or 12-03405 and 12-03406. See Accessories. This series is designated "SDRT". Ideal for use when a socket is to be used and there is significant rotation of the fastener required to complete the tightening. A socket can be used to engage the fastener. A higher amount of rotation will be needed to attain the desired torque.

P/N 12-03406 .......... $87.50

3/8 INCH SQUARE DRIVE RATCHET INTERCHANGEABLE HEAD

Note: Must be used with part numbers 12-03404 or 12-03405 and 12-03406. See Accessories. This series is designated "SD". Ideal for use when a socket is to be used and there is significant rotation of the fastener required to complete the tightening. Calibrating the wrench on a torque tester, a socket can be used to engage the fastener. A small amount of rotation will be needed to attain the desired torque.

P/N 12-03407 .......... $45.00
