H2OUT PORTABLE SPACE DRYERS

H2Out™ Space Dryers are small portable dehumidifiers that keep interiors dry and fresh. Packaged in a stainless steel canister, they are easily renewed by placing in an oven for 1-2 hours at 300°F and can be used over and over again. This technology prevents water damage, condensation and contamination - preventing mold, mildew and odors.

H2Out™ is not messy or corrosive like the old fashioned bucket product in a bucket. Protect your valuables from moisture damage, rust and corrosion. Perfect for your: Plane, Tool Box, Tackle Box, Boat, RV, Car even the Freezer.

ECONOMY PORTABLE SAND BLASTING SYSTEM

A new portable blasting system for cleaning and surface preparation of metal, plastic, fiberglass or wood. Ideal for graffiti removal from brick or stone surfaces. Dee-Blast system consists of an abrasive hopper 20-1/2” high and 9-1/2” diameter molded PVC duct with tight fitting top to keep abrasive media clean. Hopper capacity is 50 to 65 lbs. of media. It has a 10 ft. long rubber hose, a full-length face shield and a trigger-operated blasting gun that completely mixes air and media to produce a uniform spray pattern.
P/N 12-00173.............................$268.95

PORT-A-BLAST SANDBLASTER

The Port-A-Blast sand blast gun is a complete sand blast unit. Fill the container with the abrasive material, connect the gun to your air line and it is ready to go to work. Will operate on air pressure as low as 60 PSI. However, for best results, 100-500 PSI are recommended. The greater the pressure the faster the cutting. The gun can be used to siphon abrasives or liquids directly from a hopper or bucket, using a flexible siphon tube, and eliminating the 1Qt. container. Compatible Abrasives: - Silica Sand - the cheapest and most widely used for average work. - Glass Beads - Black Beauty Abrasive - Aluminum Oxide Abrasives - for fast cutting and fine texturing and etching. - Nut Shell Abrasives - for cleaning and polishing hard surfaces without scratching. - Metal Shot - for removal of hard surfaces such as porcelain.

Flexible siphon tube..........................P/N 12-00175.............................$10.95
Replacement Ceramic nozzle ................P/N 12-00493.............................$15.85

DELUXE PORTABLE PRESSURE BLAST SYSTEMS

These Portable Pressure Blasters are designed to make the most efficient use of your air and abrasive supply. These are not inexpensive siphon units. The entire tank is filled with air and sand under pressure. When the nozzle and valve is opened the sand and air mixture is released under tremendous pressure to quickly remove paint, rust, scale and other coatings. These units are 3-5 times faster to use than siphon units. All units arrive complete with pressure vessel, sandblast hood, and sandblast hose. Simply fill with abrasive and attach to your air supply and you are ready to begin blasting. Order by Part no.

ABRASIVES, Black Beauty: Economical, fast cutting abrasive. For quick removal of paint and rust. 80# bag.
