Sun visors rotate and extend to offer complete cockpit protection from the sun. The oversized, tinted lens filters out 95% of the ultraviolet rays, reduces glare by 94% and heat by 86%. Distortion free. Fully STC'd and PMA'd. The system, which includes pilot and co-pilot visors, installs in minutes. Each visor system: C-210 non-presurized requires 1.5 hrs, C-152 requires rivet installation by an A&P, C-177 req. 6-8 hrs.). Visit or website for specs., installation, and application data.

**UNIVERSAL SUNVISOR FOR HOMEBOUGHT AIRCRAFT**

Universal Swivel Mounts - simplify installation into most homebuilt aircraft! Lightweight hardware and optical quality bronze acrylic visor. Designed, and visor tint specified, by eye doctor/pilot Dr. Steven DeGroff, to reduce, high-altitude and ocular media small-particle scatter and enhance vision at dusk, after sunset, when scotopic vision is used. Hundreds of same class visors are field-approved and in use in the Comanche fleet.

**DIM-IT MOVEABLE VISOR**

You can keep moving your head to stay in the shade of your visor, or you can get a DIM-IT visor and move it to where you want it. It's a 6"x12" sheet of tinted Lexan that can be positioned on any window in the cockpit to create a means of the attached vinyl suction cup. An optional self-adhesive adapter plate lets you attach it to porous surfaces as well. Completely transparent and distortion-free. P/N 1772

- $7.95
- $4.65

**MINI DIM-IT**

This update kit will fit any Rosen system that does not come standard with third axis option (Piper systems, for examples, come with third axis stand). P/N 13-04014

- $72.85
