FIRE EXTINGUISHERS – RESCUE EQUIPMENT

H3R AVIATION FIRE EXTINGUISHERS
The FAA recommends and/or requires Halon fire extinguishers on aircraft. H3R Halon fire extinguishers are the extinguishers of choice in the aviation industry. They cause no mess or damage, and do not require taking a plane out of service for “Anh” up; a costly process for both the aircraft owner and insurance carrier. The heat-seeking quality of the Halon gas makes it a superior fire fighting agent.

DISPOSABLE, LOW-MAINTENANCE HALON 1211-1301 BLEND –

RECHARGEABLE, STURDY INDUSTRY-STANDARD HALON 1211 –
Required on commercial transport aircraft. Although classified a “liquid streaming agent,” Halon 1211 also performs remarkably well as a “total flooding agent,” seeking out and extinguishing fires in inaccessible places. A 5-year maintenance and 12-year hydrostatic test are required. Rugged steel cylinder. Pressure gauge enables easy confirmation of charge. Tested to ANSI/UL 711 and UL 1093. Meets DOT requirements. Meets the requirements in Advisory Circular 20-42C, “Hand Held Extinguishers for Aircraft” and/or NFPA 408, “Standard for Aircraft Hand Portable Fire Extinguishers.” Fire extinguishers include a mounting bracket or a wall hook.

H3R BILLET MOUNTS
H3R Performance hand held 1 lb. and 2.5 lb. fire extinguishers come standard with aviation style mounting brackets. Stylish and versatile billet mounting accessories are also available. Band clamps fit 2.6” or 3.0” diameter fire extinguishers, and can be combined with the flat surface mount or either of the two roll bar mounts. Available in polished and brushed finishes. One year limited warranty.

SAFECRAFT FIRE EXTINGUISHERS
A feature not found on other extinguishers is the “swivel” head design. The discharge head can be rotated to align the pull cable, which provides more installation flexibility. The aluminum cylinder is U.S. DOT approved and is capable of being recycled by Safecraft Inc. The extinguisher will accept two separate cylinders with red aluminum anodized head. Designed to be ordered with the aircraft in the “head down” attitude.

C-STROBE LIGHT
The C-Strobe Light is a life preserver signaling emergency strobe which attaches to a life jacket or life vest with a steel pin or Velcro straps. The omni-directional strobe light is visible up to 2 miles. C-Strobe features a slim, lightweight, waterproof case and operates more than 8 hours (continuous). Operates on 2 AA alkaline batteries (not included).

MINI B 300 PERSONAL RESCUE TRANSMITTER
- In-line speaker emits audio warble to confirm activation and transmission of distress signal or to notify of accidental activation
- Exclusive ACR audio-injection of transmission allows effective self-test - User-replaceable battery
- Frequency stability exceeds ETS 300 152 standard
- Perfect for use as Crew-Overboard system when combined with Vecta™ Direction Finder - Floats dropped overboard
- 121.5 MHz (SAR frequency)
- Antenna maximizes peak effective radiating power when fully extended.
- Battery installation instructions included Operating life: 24 hours @ 12 VDC P/N 13-03418 .............. | $209.95 |

RESCUE LASER FLARE MAGNUM™
A handheld nighttime laser signaling device that provides a convenient, effective way to signal a rescue party up to 20 miles (32 km) away, depending on atmospheric conditions. It’s ease of operation, long life and waterproof design makes it the perfect survival signaling device. Unlike conventional pyrotechnic flares, the Rescue Laser Flare™ is non-flammable, non-hazardous and can operate continuously for 72 hours on two replaceable AA batteries.

ACTIVE EXTINGUISHING LINE
Active Extinguishing Line is totally independent, 1kg, fire extinguishing system from any power source. Its main secret lies in the heat detector in a form of a line made out of special laser predriller polymer, which will react instantly to any source of heat or fire. This line (heat detector) is connected to reservoir containing fire-extinguishing agent: hexafluoropropane FE-36. Inside of the protected device the loop made out of the heat detector creates a mini sprinkler, directly over source of fire or heat, extinguishing it instantly. In a moment of activation the closed circuit switch collapses sending a signal informing of fire. For experimental aircraft only. Ask for status of pending STCs................. | P/N 13-03266 .............. | $698.00 |

1301 HALON FIRE SUPPRESSION SYSTEM
The Stroude 1301 Halon System is intended for use in Experimental and Personal light aircraft. The complete system includes 5 lb. 1301 Halon bottle with mounting assembly, actuating valve, 3 spray nozzles, Bulkhead Tee, and 25 feet of aluminum tubing and 16 ft. long pull cable. 1301 Halon is approved for occupied areas and leaves no residue.

P/N 13-07670 .............. | $523.00 |

RECHARGEABLE, DURABLE EPA-APPROVED HALOTRON 1™
While it is less powerful pound for pound than Halon 1211, Halotron 1 offers all of Halon 1211’s clean agent characteristics and is made of durable ABS plastic. Waterproof & weighs 4 oz. Size: 2” dia. x 5-3/8”h. Excellent addition to any aircraft or home emergency kit.
