TINDER HOT BOX SOLAR FIRE STARTER SURVIVAL KIT
The Tinder HOT Box Solar Fire Starter™ is a tinder storage box that can start a fire using solar energy, and the inside top cover is also a signal mirror! The Tinder HOT Box Solar Fire Starter™ is used to store fire starting tinder in the air/water tight tinder box portion of the unit that is sealed from the elements using an o-ring seal. This keeps the damp air/water out so your tinder always stays dry! The Tinder HOT Box Solar Fire Starter™ is also a solar powered fire starter. It is designed to function in any environment that will support life; the Tinder HOT Box Solar Fire Starter™ will literally function for as long as our Sun will shine and there is tinder to be found! As a matter of fact our Tinder HOT Box Solar Fire Starter will even function on other planets. 2.625 inches in diameter .725 inches thick weighs only 4 oz. can easily fit in your pocket.

P/N 13-08566..........................................$25.99
