PILOT FLASHLIGHTS

SUREFIRE AVIATION FLASHLIGHTS

Long known as a major supplier of quality flashlights to law enforcement and the military, Surefire has just made available a new flashlight built for aviators that combines two widely different light sources in a single compact illumination tool providing dual power and variable output. Surefire's dual-output flashlights feature the finest beams, reflectors, switches, and powerful tungsten lamps available on the market today. They are not inexpensive but for the pilot looking for a truly unique, high quality, reliable flashlight, Surefire is the answer. Surefire flashlights carry a lifetime warranty (excluding batteries and lamps).

The A2 Aviator features a high-output incandescent lamp producing 50 lumens surrounded by 35mm LED’s set in a specially designed parabolic reflector. The Aviator’s digitally controlled two-stage switch allows the pilot to choose LED’s for high light illumination in the cockpit or high output lamp for bright illumination during preflight inspection of your aircraft. The high beam on the A2 Aviator can illuminate the tail of a 747 from the ground. That’s over 63 ft high! Not bad for a flashlight that measures only 5.6” in length and weighs only 4 oz. The A2 Aviator comes standard with a gray-green super-tough Type III hard anodized finish to military specifications, because it is the best and the toughest. It is powered by 2 lithium batteries, is shock-proof, water-resistant and comes with a lifetime guarantee (excluding batteries and lamps). Length: 5.9”

The A2 LED Aviator is a compact dual-output flashlight that provides two distinct beam types and optional output colors. It uses virtually indestructible power-regulated LED emitters and a precision micro-textured reflector to produce both spot and flood beams. Press for a momentary-on 10-lumen long-runtime flood beam for general night use, close work, or where you need to preserve your night vision; press further for a momentary-on 120-lumen white spot beam—six times over 63 ft high! Not bad for a flashlight that measures only 5.6” in length and weighs only 4 oz. The A2 LED Aviator comes standard with a gray-green super-tough Type III hard anodized finish to military specifications, because it is the best and the toughest. It is powered by 2 lithium batteries, is shock-proof, water-resistant and comes with a lifetime guarantee (excluding batteries and lamps). Length: 5.9”

The G2 Nitrolon is Surefire’s most economical flashlight, and uses 2 lithium batteries to produce 65 lumens of diamond bright light for 60 minutes. The G2 is constructed of Black Nitrolon, a polymer compound that is lightweight, corrosion-proof, and non-conductive. Depress the tailcap on the G2 for momentary illumination or rotate fully inward for constant-on illumination. Length: 8.9”

A2 Aviator with red LEDs.......................... P/N 13-03254.......................... $213.50
A2 Aviator with blue LEDs.......................... P/N 13-03255.......................... $199.50
AZL Dual Aviator with white LEDs............. P/N 13-07086.......................... $221.20
G2 Nitrolon flashlight (Plastic Body).......... P/N 13-02201.......................... $41.30

SUREFIRE REPLACEMENT BULB MA02

The MA02 lamp assembly fits A2 Aviator flashlights and produces 50 lumens of light for 1 hour. P/N 13-04438.......................... $18.20

FLIGHTLIGHT™ - PILOT FLASHLIGHT

This AirClassics™ flashlight has both white and red lenses for preflight and night flying, extra Krypton bulb stored within, is water-tight, corrosion-resistant, and features a clicking ON/OFF for maximum battery life. Focuses from spot to flood light. Black machined aluminum with ASA wings logo. Two AA batteries and PR-1 bulb included.

Flashlight: P/N 13-01067.......................... $15.85
Bulb: P/N 13-02320.......................... $4.85

PELICAN AVIATION LIGHTS

VERSABRITE

This is the world’s brightest swivel head pocket flashlight. The adjustable head swivels 180 degrees, enabling the pilot to direct the beam where he needs it. It is water resistant and mounts directly on the adhesive pad of yoke chart holders. Provides 6000 candlepower Xenon lamp beam spot beam, and comes, red, green, and blue-green lenses. Clips easily on shirts, belts, and caps for hands free use. Comes with multi-use velcro fasteners and 2 AA batteries.

P/N 13-00561.......................... $25.50

MICRO ONE WATT LED FLASHLIGHT

Has a 1-Watt, 80-Lumen LED chip that emits over 4,300 End-Foot candles (4300cd) of bright, cool white (8000 Kelvin) light * One Year Warranty * Focusable Lens: Narrow and Wide Beam * Patented LED Candles of light * Retains 50% of its light output after 1 hour of continuous use * Visibility approx. 2 miles, depending on atmospheric conditions and line of sight * Lights for 4 days (96 hours) at a diminishing light output rate * Uses 3 standard AAA batteries * Rugged Anodized Aluminum Body Finish * Push button on/off switch * Weight: 3.5 oz. without batteries, 4.8 oz. with batteries. Furnished with nylon holder.

P/N 13-07470.......................... $37.85

PILOT’S HANDY LANYARD LIGHT

This emergency light with a break-away neck lanyard is great for use around any aircraft. Ideal for pre-flight inspections after dark, providing you with a small, powerful source of light which you can simply hang around your neck as you preflight the aircraft. Also makes the perfect cockpit light in an emergency. Furnished with blue-green and red lenses for night flying as well as standard clear lens. Includes lanyard & 1 AAA battery.

P/N 13-00571.......................... $19.95

MINI LED FLASHLIGHTS

Only 3.5 inches long. NOT water resistant. DUAL Ultra-bright LEDS with lifetimes of 100,000+ hours, never break, and provide smooth illumination. This is the only illuminator with four modes of operation: * 360 degree rotation * Exclusive brightness regulation circuitry — keeps the LEDs shining bright as batteries age, • 9 Volt Battery & 20 inch neck strap included.

White & Red.......................... P/N 13-04696.......................... $22.95
Red & Green.......................... P/N 13-04697.......................... $22.95

MYGRIPLED (LED)

Performs as an organizational tool as well as a multifunctional flashlight. Organizes writing instruments, cell phones, eyeglasses, flight charts and other documents by means of a patented polyester snap-in-lock structure. The patented multi-purpose light is connected to the organizational tool by means of a flex-arm. The light has 360 degree rotation and can be removed from the organizer to act as an independent lighting instrument. Offers both white and red light illumination on demand.

Attaches with Suction Mount.......................... P/N 11-09665.......................... $9.95
Attaches with Velcro Mount.......................... P/N 11-09669.......................... $9.95

FLITELITE FINGER LIGHT

A simple light that attaches to the finger. An integrated, battery saving 10-minute auto-off. Simple touch the button and light will shine wherever the pilot points.

Green.......................... P/N 13-07275.......................... $8.90
White.......................... P/N 13-07276.......................... $7.95
Red.......................... P/N 13-07277.......................... $6.50

STREAMLIGHT FLEXIBLE FLASHLIGHT

The Streamlight has a 6.21" flexible, insulated cable extension allows 14 inches for hard-to-reach areas. Made of silver aircraft aluminum casing and a tough PVC shielded cable. Unbreakable, 100,000-hour white LED that never needs replacing, has a run-time of up to 60 hours. (4) AAA batteries included. Wt: 1.1 oz.

P/N 13-03142.......................... $25.75

COAST PX20 DUAL LED FLASHLIGHT

The PX20 Dual Color LED Flashlight combines five super bright white LEDs with one red LED. Each LED is controlled by a separate switch, allowing you to turn on the desired color with one click; no cycling through switch modes to find your color. The white light is for general flashlight use, while the red LED is perfect when you only need minimal light, such as when reading a handicraft. A long-life aluminum casing offers great durability and will hold up to heavy daily use.

P/N 13-12049.......................... $27.95

SUREFIRE G2X™ PRO

A polymer-body version of the 6PX Pro, uses a highly efficient LED—virtually immune to failure since there’s no filmament to burn out or break—that provides two light output levels: a brilliant, penetrating, perfectly pre-focused 200-lumen beam, and a 15-lumen low-output setting that lets you greatly extend the runtime per set of batteries, an invaluable option when you find yourself miles from civilization. Press the tailcap switch for momentary-on low, press further for a momentary-on 120-lumen white spot beam—six times the light of a big two-D-cell flashlight; twist for constant-on low beam, twist further for constant-on high beam. The L1 Lumimax features a 1W Luxeon LED which produces 15 lumens from one Surefire 3V lithium battery, which is three times brighter than a conventional mini light running on two AA alkaline. For the pilot needing only the soft light of LED lighting for cockpit illumination, the L1 Lumimax is an excellent choice. Length: 4.6”

The G2 Nitrolon is Surefire’s most economical flashlight, and uses 2 lithium batteries to produce 65 lumens of diamond bright light for 60 minutes. The G2 is constructed of Black Nitrolon, a polymer compound that is lightweight, corrosion-proof, and non-conductive. Depress the tailcap on the G2 for momentary illumination or rotate fully inward for constant-on illumination. Length: 8.9”
