SAITEK FLIGHT SIMULATION

CYBORG V.1 FLIGHT STICK

Ergonomic, ambidextrous stick with trigger and five buttons. Pinkie switch operates as a normal control or can be programmed as a ‘shift button’ to double up your control functions. Throttle lever for smooth, realistic engine control. Twist action rudder control. Unique independent Throttle leg. Pre-cut tabs allow you to add Saitek labels for easy storage. Supplied with Saitek’s powerful SST programming software. Compatible: Windows 7, XP/XP64, and Vista. P/N 14-03011 $319.50

CYBORG F.L.Y. 5 FLIGHT STICK

Tilting head mechanism. Adjustable head buttons – Adjustment tool – Stores securely in the stick base. Twin Throttle – Control separate engines or assign one throttle to the engine and the other lever to another function such as elevator trim. Shift button – Doubles up the number of assignable buttons on the Cyborg X when using the included ST Programming software. 12 buttons. P/N 14-02958 $69.75

SAITEK F.L.Y. 9 WIRELESS FLIGHT STICK FOR XBOX 360

Throttle and twist rudder controls for complete maneuverability. Unique base design features removable feet. Wireless connection syncs quickly and easily with your console. Superior control for your flight games! P/N 14-02862 $129.99

SAITEK X52 FLIGHT CONTROL SYSTEM

Enhanced game play through intuitive Multi-Function display (MFD). Illuminated buttons and MFD - ideal for low light environments. Rubber grips and ergonomic design for increased comfort and fatigue-free gaming. Includes Roger Wilco Chat software - the ideal accompaniment for on-line multiplayer gaming. P/N 14-02845 $138.85

SAITEK X52 PRO FLIGHT SYSTEM

The MFD screen is now interactive. Now you can display important in-game information such as the Radio Stack and interact with your games directly. Shipping with support for Microsoft's Flight Simulator X, there’s also a Software Development Kit (SDK) included which allows budding programmers to create interactions with their own favorite games. P/N 14-00649 $169.95

SAITEK PRO FLIGHT YOKESYSTEM

Meets the exacting needs of the true flight simulation enthusiast. Stainless steel shaft, ergonomic controls, integrated chronograph and separate throttle quadrant. Use the integrated USB Hub to easily connect other parts of the Saitek Pro Flight range of products, such as additional Pro Flight Throttle Quadrant, Pro Flight Instrument Panel (sold separately). P/N 14-00598 $149.85

SAITEK PRO FLIGHT INSTRUMENT PANEL 6 PACK

 Featuring a stunning 3.5” colour LCD screen, the Instrument Panel can display 6 of the main cockpit instrument panels from Microsoft’s Flight Simulator X. Choose between 6 different flight instruments at the touch of a button: Altimeter, Attitude Indicator, Airspeed Indicator, Compass, Turn and Slip indicator, and Vertical Speed. P/N 14-03010 $774.95

FLIGHT TRAINING COCKPIT ADVANCED PANEL

Advanced Panel offers a cockpit-realistic way to mount Saitek Pro Flight Simulation Instruments and Controls. The Advanced Panel twist-and-remove pre-cut tabs allow you to add Saitek hardware to your Advanced Panel over time and trade simulation devices between slots. Small tabs accommodate up to 10 Pro Flight Instruments. Each Saitek Flight Instrument Panel allows you to digitally switch between simulation flight instruments. Alternatively, mount a Hannspree HL1618BB 16” Screen LED-Lit Monitor in one of several possible Panel face mounting configurations. P/N 13-13088 $319.00

SAITEK PRO FLIGHT THROTTLE QUADRANT

Upgrade your flight simulation experience with the Saitek Pro Flight Throttle Quadrant. This makes an ideal addition to the Saitek Pro Flight Yoke System to expand the number of controls for your flight simulation setup. Set the levers to control aircraft throttles, adjust elevator trim, control mixture or even to engage reverse thrust during landing. The Pro Flight Throttle Quadrant will work in any major flight simulation to give you all the control you need. P/N 14-00601 $59.95

SAITEK PRO FLIGHT RUDDER PEDALS

Complete your virtual pilot’s controller setup and take flight simulation reality to the next level with the Pro Flight Rudder Pedals. Control the rudder and take command of your aircraft with your feet - just like real pilots. Adjustable, smooth action gives you optimum control and realism, and brings you even closer to the experience of flying a real aircraft. P/N 14-02849 $119.85

PRO FLIGHT COMBAT RUDDER PEDALS

Inspired by pedal designs found in modern fighter aircraft such as the F16 or F35, the Rudder Pedals are constructed from a highly robust Di-cast alloy, providing durability and authenticity for the most demanding of aspiring pilots. Independent left and right brake axes allows for greater accuracy and precision when performing braking maneuvers. Self-centering rudder axis works in conjunction with a user configurable dampening adjuster, allowing users to define levels of pressure required to operate rudder controls. P/N 14-00714 $99.95

SAITEK PRO FLIGHT SWITCH PANEL

Upgrade your flight simulation experience for Microsoft Flight Simulator X with the Saitek Pro Flight Switch Panel. Whether attached to the Saitek Pro Flight Yoke System, free standing on a desk or mounted into your own cockpit setup, the Pro Flight Switch Panel is an ideal way to expand the number of controls for your flight simulation setup. P/N 14-00601 $199.95

SAITEK PRO FLIGHT RADIO PANEL

Upgrade your flight simulation experience for Microsoft Flight Simulator X with the Saitek Pro Flight Radio Panel. LED displays work fully in real time with Flight Simulator X and 2004, allowing the user to bring the radio stack up on screen. A set of switches and LED displays for use in controlling various aspects of flight simulation. COM1 / COM2 / NAV1 / NAV2 function. DME / ADF / XPDR functions. P/N 14-00509 $154.75

SAITEK PRO FLIGHT TPM SYSTEM - THROTTLE/PROP/MIXTURE AXIS

Fully compatible with all major flight simulation titles and pre-existing flight simulation set ups, the Pro Flight Throttle, Pitch and Mixture System replicates the control surface found in fixed wing aircraft, such as the Cessna®, Piper® and Money Bravo®. Three durable aluminium rods allow users to accurately alter throttle, pitch and fuel mixture levels and an additional 9 fully programmable toggle switches provide a host of user defined controls during flight. Connectivity: USB 2.0. P/N 14-02850 $149.95

SAITEK FLIGHT BACKLIT INFORMATION

Compatible with Microsoft® Flight Sim™ X and Flight Sim™ 2004, the Pro Flight Backlit Information Panel provides users with clear and authentic information during flights. Command tiles not illuminated remain invisible to the naked eye, allowing pilots to accurately access the information they need, when they need it. Connectivity: USB 2.0. P/N 14-02848 $149.95

SAITEK PRO FLIGHT MULTI-PANEL

 Upgrade your flight simulation experience for Microsoft Flight Simulator X with the Saitek Pro Flight Multi Panel. LED displays work fully in real time with Flight Simulator X and 2004, removing the need to bring the autopilot up on screen. A set of switches and LED display for use in controlling various aspects of flight simulation. Full Autopilot panel associated with setting controls: Auto Throttle, Flaps, Elevator Trim wheel. Connectivity: USB 2.0. P/N 14-02859 $149.95

SAITEK PRO FLIGHT INSTRUMENT PANEL

 Featuring a stunning 3.5” colour LCD screen, the Instrument Panel can display 6 of the main cockpit Instrument panels from Microsoft’s Flight Simulator X. Reacting and updating in real time with events from the Sim, the Instrument Panel brings an extra level of realism to your flight simulation setup. Choose between 6 different flight instruments at the touch of a button: Altimeter, Attitude Indicator Airspeed Indicator Compass Turn and Slip indicator, Vertical Speed. P/N 14-00870 $199.95
