These books are a pilot’s best bet. Included with every FAA question are the answers, explanations, subject codes and references, as well as explanations for incorrect answers. All test questions in the FAA test question database are included here and have been arranged into chapters based on subject matter. Topical study, in which similar material is covered under a common subject heading, promotes better understanding, aids recall, and thus provides a more efficient study guide.

Private/Recreational Pilot ......................................... P/N 13-00984 .................. $13.85
Instrument Rating ....................................................... P/N 13-00974 .................. $16.65

Certified Flight Instructor .................. P/N 13-32311 ............................ $19.95

GFT TRACK TEST GUIDES 2014 BOOKS FOR AVIATION MAINTENANCE

To prepare students for the FAA knowledge exams required for A&P certification, each guide contains exact FAA questions with answers, explanations and references in the “Fast-Track” format to promote increased learning comprehension and retention. Prepared by industry expert Dale Crane, the Fast-Tracks also include a helpful guide to the Practical & Oral Tests.

General (152 pages) ................................................... P/N 13-32323 ..................... $8.95
Airframe (200 pages) .................................................. P/N 13-32322 ..................... $9.50
Power Plant (200 pgs) ................................................ P/N 13-32321 ............................ $9.95

The Inspection Authorization Test Prep provides aviation maintenance technicians (AMTs) with all the resources needed to pass the FAA’s exam for inspection authorization, and helps candidates become familiar with the privileges and limitations of the highest level of maintenance certification. This book is an important reference source for all AMTs seeking to add Inspection Authorization (IA) to their qualifications, as well as AMT schools preparing students for the IA test. The IA exam is different from other FAA exams in that it remains a “closed test”—the exact database of questions is not available to the public. The more than 450 sample questions typify those that candidates are likely to encounter when taking the IA Exam. Also features an internet element that provides readers with additional tools and resources. Conveniently compiles the reference materials necessary to prepare for this exam into one volume, for an organized study program that AMT schools, instructors, and individuals alike can use to streamline their studies.

P/N 13-01297 ........................................................ $29.75

CERTIFIED FLIGHT INSTRUCTOR DVD COURSE-VIRTUAL TEST PREP

More than 10 hrs of high-quality DVD presentation meets all FAA Part 61 home study requirements. All the information needed to ace the FOI, CFII, BGI and AGL FOI is covered through exciting in-flight video and dynamic instructional aids and interactive quizzes. Includes 2013 Test Prep book and Computer Testing Supplement. A bonus DVD, Flight Review is included which covers the required specifics for a Biennial Flight Review.

P/N 13-01081 ........................................................ $47.75

ORAL & PRACTICAL EXAM GUIDE

This book prepares the AMT for the general, airframe, and powerplant exams with information on the certification process, typical projects and required skill levels, practical knowledge requirements in a question and answer format, and reference materials for further study.

P/N 13-50165 ........................................................ $8.50

VISUALIZED FLIGHT MANEUVERS

Excellent learning and teaching aids for instructors and students, these handbooks comply with current practical test standards and regulations. Fold-out pages allow each maneuver to be complete on a single page spread, so the reader absorbs all the visual/textual information at once. Covers Private, Commercial and Flight Instructor maneuvers.

For High-Wing aircraft .............................................. P/N 13-02289 .................. $13.95
For Low-Wing aircraft ............................................... P/N 13-05854 .................. $15.95
For Kat Aria aircraft .................................................. P/N 13-02291 .................. $14.95

INSTRUMENT FLYING

A step-by-step course covering all the knowledge requirements to pass the Instrument FAA Knowledge and oral exams, as well as an instrument check ride. A flight and ground training syllabus is available.

P/N 13-00979 .......................................................... $56.95

THE COMPLETE PILOT SERIES

Bob Gardner’s series of textbooks has been in publication since 1985 and is continually updated and expanded. Mr. Gardner writes in a conversational manner that is readable, comprehensive, and more importantly, will lead the reader to a greater understanding of the material. All his books are reinforced by the caliber of personal experience that integrates ‘technique’ and ‘procedures’ with mastery.

THE COMPLETE MULTI-ENGINE PILOT (3RD EDITION) - The best textbook available for learning the fundamentals of flying multi-engine aircraft and aerodynamic laws that govern multi-engine flight under Bob Gardner’s experienced and energetic tutoring.

P/N 13-06661 ........................................................ $17.75

THE COMPLETE ADVANCED PILOT (3RD EDITION) - Many students prepare for the Commercial certificate and Instrument rating simultaneously, as a method to train efficiently, cut expenses, and expedite the process. This book combines these two phases in flight training to produce the most effective program towards completion. Review questions follow each chapter.

P/N 13-05714 ........................................................ $21.60

THE COMPLETE PRIVATE PILOT SYLLABUS (3RD EDITION) - A comprehensive guide that stresses the importance of integrated flight training — providing both flight and ground training for more complete preparation. It is written to satisfy both Part 141 and Part 61 requirements. 126 pages.

P/N 13-02268 ........................................................ $8.95

MULTI-ENGINE FLYING

Multi-Engine Flying, by Paul Craig is a thorough and complete training manual on multi-engine flight covering multi-engine aerodynamics, normal and emergency procedures, multi-engine performance, and both simple and advanced aircraft systems. Advanced systems, including turboprop and jet engines common to high performance commercial aircraft are then discussed including high altitude operations, and modern glass cockpit systems.

Book .............................................................. P/N 13-07604 .................. $48.75
E-Book .............................................................. P/N 13-05912 .................. $37.50

ASA FAR/FC

Parts 1, 63, 65, 91 Subpart K, 119, 120 Newl, 121, 135, and 49 CFR 175 (Hazmat), and Newl 1544 (TSA). Part 25 is available as a free download! Free Updates available online for instant access to regulation and procedural changes. Free Update email subscription service — ASA will email you when a new Update is available. Unabridged FAR Parts from Titles 14 and 49 of the Code of Federal Regulations (14 and 49 CFR). Changes and updates since last edition clearly marked. Comprehensive FAR index. Softcover, 496 pages.
