FLIGHT MANUALS BY WILLIAM KERSHNER

THE ADVANCED PILOT’S FLIGHT MANUAL 7TH EDITION – Provides information needed by veteran pilots preparing for the commercial written and flight tests. Explains effects of light, drag, thrust, altitude, and temperature on aircraft performance. Includes over 440 tables, charts and illustrations plus a sample commercial written test and answers. 342 pages. P/N 13-32225 ..............$22.95

BASIC AEROBATIC MANUAL – In this manual covering basic aerobatics, Bill Kershner introduces maneuvers in order of difficulty, covering a variety of them in his clear, understandable, and humorous style. The Basic Aerobatic Manual is fully illustrated with the author’s own drawings and contains a practical syllabus, a detailed bibliography and an index. Though the manual emphasizes airspeeds and techniques recommended for the Cessna 182, the maneuvers described in the book may be performed in other airplanes certified for aerobatics. Softcover. P/N 13-32220 ..................$21.75

DICTIONARY OF AERONAUTICAL TERMS (DALE CRANE) – A 1-volume library, explains more than 5,000 aeronautical terms and hundreds of abbreviations you should know. Almost 600 pages. Emphasis on aeronautical mechanics, engineering, electronics, and production. P/N 13-28700 ..................$16.95

DUAT AND WEATHER INTERPRETATION HANDBOOK (WILLIAM B. SANDERS & JOHN P. DAVIS) – get up and running on DUAT and translating National Weather Service reports. Shows how to log on to the DUAT, access weather briefings, files, amend, and cancel flight plans, interpret weather diagrams, encode and decode locations. P/N 3004A ..................$8.75

BURT RUTAN: AERONAUTICAL AND SPACE LEGEND – Tobe driving intellectual and organizational force behind the first non-stop, around-the-world flight with the Voyager aircraft, and then to do the same for the first privately-activated suborbital space flights in Space Ship One – no one else spans such a range.” Known as “the man who reinvented the airplane,” Rutan is an American national treasure and Aleph’s informative story of his achievements is a compelling tale of innovation, creativity, entrepreneurship and family. Book. P/N 13-11993 ..................$19.99

THE INSTRUMENT FLIGHT TRAINING MANUAL (PETER DOGAN) – Simplifies IFR for the student and updates the veteran, follows the format of all Cessna flight training programs step by step. Chapters include knowing and using instruments, attitude instrument flying, IFR planning and procedures, VOR, ADF, holding, approaches, emergencies, and more. Review questions each chapter, pertinent FAA’s, anecdotes and advice from instrument pilots. 276 pages, 150 illus. New third edition, completely updated and revised for 1992. P/N 13-33325 ............$38.50

INSTRUMENT PILOT FAA WRITTEN EXAM (IRVIN N. GLEIM) – The easiest, fastest, and least expensive method to pass the FAA written examination. All 832 FAA questions, answers next to each question, and outlines of what you need to know for each chapter. Only airplane questions are included. P/N 13-32520 ..................$19.95

OWNING, BUYING OR FLYING THE CESSNA 150/152 – If you are considering buying a Cessna 150/152, or already own one, this book covers it all! Mike Arman is an advanced ground instructor, who uses his knowledge of flying, to impart helpful information to students and experience alike. Tips on buying, maintaining and upgrading a Cessna 150/152 are plentiful in this useful and entertaining book. P/N 13-03481 .............$23.95

ATC & WEATHER: MASTERING THE SYSTEMS (2ND EDITION, BY RICHARD COLLINS) – In this exciting new edition, Richard Collins explains how to work air traffic control and navigate to maximum efficiency on every flight. The emphasis is on judgment and the interface between pilot and environment. Addresses both VFR and IFR situations, from flight planning on through to arrival and landing. Soft cover, 172 pages, illustrated. P/N 13-02356 ..................$14.95

NOTES OF A SEAPLANE INSTRUCTOR: AN INSTRUCTIONAL GUIDE TO SEAPLANE FLYING (BY BURKE MEE) – Gives pilots all the information they need to add a seaplane to their certificate. All the seaplane maneuvers are covered, starting with preflight, through taxiing, takeoff, landing, and postflight procedures; also operating in various water conditions, stability of the aircraft on the water, step-by-step navigation illustrations, plus a series of charts by the author’s original seaplane notebook sketches, are included to further explain the concepts. Soft cover, 160 pages, illustrated. P/N 13-03236 ..................$14.95

PILOT’S HANDBOOK OF AERONAUTICAL KNOWLEDGE – Written for the applicant preparing for the Private, Commercial, or Flight Instructor Certificates, it is also valuable to flight instructors as a teaching aid. Providing basic knowledge essential for all pilots— from beginning student pilots to those pursuing more advanced pilot certificates—this introduces pilots to the broad spectrum of knowledge needed as they progress through pilot training. This book has all the information necessary for the Private Pilot Certificate, P/N 13-00983 ..................$15.95

SAY AGAIN, PLEASE: GUIDE TO RADIO COMMUNICATIONS – (2nd edition, by Bob Gardner) – This new edition adds material on GPS, Land and Hold Short Operations (LAHSO), and has been expanded and updated to reflect current rules and operating procedures. Chapters cover communication etiquette and rules, understanding radio equipment, emergency situations, and IFR communications & clearances. Also included: a concise summary of the FAA’s communication facilities and their functions, airspace classifications and definitions, and FAA’s recommended shorthand for copying clearances. Soft cover, 208 pages, illustrated & indexed. P/N 13-01064 ..................$16.95

INSTRUMENT FLYING HANDBOOK – This primary FAA source handbook for the Knowledge Exams covers the IFR system as well as aerodynamics, flight instrumentation, attitude flying and navigation, as they apply to the instrument pilot. P/N 13-00986 ..................$19.95

MENTAL MATH FOR PILOTS (BY RONALD MCELROY) – If you are simply looking for a way to improve your math skills in the cockpit, then this book is a must read. Mental Math revs up the brainpower to quickly process not only those pesky math questions asked during airline interviews, but expands the mental hard drive to handle a wide range of practical number problems in flight. Soft cover, illustrated, includes index & glossary, approximately 117 pages. P/N 13-03201 ..................$14.95

BUSH & MOUNTAIN FLYING BOOK – This book is for the applicant preparing for the Private, Commercial, or Flight Instructor Certificates, it is also valuable to flight instructors as a teaching aid. Providing basic knowledge essential for all pilots—from beginning student pilots to those pursuing more advanced pilot certificates—this introduces pilots to the broad spectrum of knowledge needed as they progress through pilot training. This book has all the information necessary for the Private Pilot Certificate, P/N 13-00983 ..................$15.95

FLYING THE AERONCA – Written in 1981 by the famous Robert Livingston, this book is a must read for all Aeronca owners. With over 2000 hours of Aeronca flying time, Robert has learned that all Aeronca models have common traits. He takes you through every phase of flight of the Aeronca, from beginning pilot training. This book has all the information necessary for the Private Pilot Certificate, P/N 13-00983 ..................$15.95

Mental Math for Pilots (By Ronald McElroy) – If you are simply looking for a way to improve your math skills in the cockpit, then this book is a must read. Mental Math revs up the brainpower to quickly process not only those pesky math questions asked during airline interviews, but expands the mental hard drive to handle a wide range of practical number problems in flight. Soft cover, illustrated, includes index & glossary, approximately 117 pages. P/N 13-03201 ..................$14.95

Bush & Mountain Flying Book – This book focuses mainly on highly advanced techniques and skills required to operate safely in remote and extreme conditions. However, before reading this book any further, please read the Disclaimer and Warning, as most of the flying techniques mentioned in this book are of such an extreme nature that they should never be attempted by any poorly trained, non-proficient or inexperienced pilot. P/N 13-00983 ..................$15.95

Flying the Aeronca – Written in 1981 by the famous Robert Livingston, this book is a must read for all Aeronca owners. With over 2000 hours of Aeronca flying time, Robert has learned that all Aeronca models have common traits. He takes you through every phase of flight of the Aeronca and makes it easier to fly the airplane. All 833 FAA questions, answers next to each question, and outlines of what you need to know for each chapter. Only airplane questions are included. P/N 13-32520 ..................$19.95
