FLYING IFR, 4TH EDITION (BY RICHARD COLLINS) – invaluable discussions on instrument airmanship, weather analysis, flight planning and decision making, handling equipment glitches, and that critical survival skill — partial panel flying — are all presented for the sole objective of better preparing you to fly IFR flight plans. The only test this book prepares you for are those encountered in flying actual IFR. Soft cover, 230 pages, indexed. 
P/N 13-02363 ...............$14.95

FLYING THE WEATHER MAP (BY RICHARD COLLINS) – Following an in-depth discussion of the logic of aviation weather and basic theory, Collins takes you along on 46 actual cross-country flights. The anecdotes provide a valuable education in weather interpretation, forecasting and decision making. Soft cover, 234 pages, illustrated, indexed. 
P/N 13-02368 ...............$14.95

AVIATION MECHANIC HANDBOOK – A core reference manual for mechanics, aircraft owners, and pilots, this book compiles specs from stacks of reference books and government publications into a handy, toolbox-size guide. All the information critical to maintaining an aircraft. 
P/N 13-02366 ..................$13.50

AERODYNAMICS FOR NAVAL AVIATORS – This textbook presents the elements of applied aerodynamics and aeronautical engineering which relate directly to flight training and general flight operations. Originally published by the U.S. Navy, 432 pages. 
P/N 13-01060 ..................$19.95

AVIATION WEATHER – Earth’s atmosphere, common IFR procedures, high-altitude weather and special area weather considerations are thoroughly discussed. Use with Advisory Circular 00-45E, Aviation Weather Services. Many of the FAA Knowledge Exam weather questions are pulled from this text. Effective and easy to use. 234 pages. 
P/N 13-01062 ..................$8.95

ASA AVIATION WEATHER SERVICES – Last revised in 1999, this new Advisory Circular 00-45F edition supersedes AC 00-45E, features full-color illustrations throughout, and full coverage of weather-related tools to assist every pilot’s flight planning and in-flight decisions. 
P/N 13-10229 ..................$24.85

AVIATION WEATHER COMBO PACK – Aviation Weather and Aviation Weather Services are packaged together for greater savings. Also includes laminated weather code key cards, detailing the TAF/METAR abbreviations. 
P/N 13-02341 ..................$29.75

TAMING THE TAILDRAGGER (JOHN F. BALL) – A flight manual for tailwheel aircraft, basic enough for the student pilot, thorough enough for the advanced. Includes performance figures and limitations for the classic planes, plus techniques and procedures for short- or soft-field operations, transitional from tricycle gear, and 96 pages. Paperback. 
P/N 13-27100 ..................$13.50

MAKING PERFECT LANDINGS IN LIGHT AIRPLANES (RON FOWLER) – No matter how long you have been a pilot and no matter what degree of skill you have attained, if you are to land perfectly you must exert 100% effort toward that task. Many pilots resign themselves to imperfect landings merely because they are unaware of the simple fact that even the pros must work at each landing. 
P/N 13-23500 ..................$15.95

AVOIDING COMMON PILOT ERRORS (JOHN STEWART) – The author discusses errors that pilots frequently make, particularly in controlled airspace, and advises how to fly more safely. Also explains new FAA control equipment and ATC procedures that will save you time and money during a flight. 
P/N 3033 ..................$17.50

MAX TRECOTT’S GPS & WAAS INSTRUMENT FLYING HANDBOOK – Recognizes that GPS is at the center of modern cockpits and not just add-on equipment. If you fly VFR or IFR with a panel-mounted GPS, you’re bound to learn something you didn’t know from my latest book about GPS, WAAS or operating your GPS receiver. It’s a totally new book—NOT a new version of my G1000 book—that tells you what you need to know to safely operate modern GPS systems including detailed, step-by-step instructions for the Bendix/King KLN 94, Garmin GNS 430, 430W, 480, 530, 530W and G900X, G1000 and Perspective glass cockpits. 
P/N 13-06934 ..................$43.50

SUNSET TO SUNRISE – Sunset to Sunrise by David Robson Night flight is one of the most pleasant forms of flight. Every city looks good at night. The sparkling lights, stars, moon and reflections combine to produce a spectacle many only dream about. However, night flight requires different technique, perspective, and considerations than day operations. The aircraft must be flown with reference to the flight instruments, and the outside visual references take on new importance while at the same time providing different illusions. Night flight can be a test for even the most experienced pilot. 
P/N 13-03285 ..................$39.95

INSTRUMENT PILOT FLIGHT MANEUVERS – Provides a thorough explanation of each maneuver and task called for in the FAA’s Instrument Practical Test Standards (PTS). The latest update improves upon its sound platform with even more information for the pilot seeking an instrument rating. Both the 1998 and oral PTS are included so that the manual reflects the current standards you will encounter during the checkride. In the intervening years, the FAA has changed some terminology in the PTS, and this fine-tuning is also present in this, the third, edition of the manual. With GPS and RNAV navigation much more commonplace, these inclusions have also been made by the FAA. In addition to the technical changes, the publisher has also improved the graphics to better illustrate each maneuver, while retaining those maneuvers that the FAA had deleted from its Instrument Flying Handbook for greater depth. A cross reference of applicable FAA publications to each maneuver and task helps with further research. The spiral-bound format is easy to use, clipping onto a standard, approach plate-size kneeboard for flight. 
P/N 13-02733 ..................$17.95

IFR: A STRUCTURED APPROACH EBOOK – For the instrument pilot seeking to upgrade his or her skills, John C. Eckalbar’s IFR: A Structured Approach provides compelling insights. Eckalbar, a well-regarded instructor for the American Bonanza Society, offers tips for “flying by the numbers” and specific numbers (power settings, airspeeds, and descent rates) for flying GPS approaches in particular. If you’ve been stumped by circling approaches or DME arcs, he also has much to say on those topics, as well as a two-part look at mastering the ILS. If one book could help make the leap from a bit player to a skilled conductor of instrument flight, this is it. Ebook, 250 pages. 
P/N 13-09955 ..................$29.50

AVIATION MAINTENANCE MANAGEMENT – The complete, up to date guide to managing aircraft maintenance programs. Thoroughly revised for the latest aviation industry changes, and FAA regulations. This comprehensive reference explains how to establish and run an efficient, reliable, and cost-effective aircraft maintenance program. Co-written by Embry-Riddle Aeronautical University instructors, this book, Maintenance Management, Second Edition offers broad, integrated coverage of airline management, aircraft maintenance fundamentals, aviation safety, and the systematic development and planning of successful maintenance programs. 
P/N 13-14752 ..................$69.95

CONSTRUCTION OF TUBULAR STEEL FUSELAGE BOOK – This book provides step by step instructions on how to construct a perfect tubular steel fuselage. It is the result of hundreds of hours of development in the shop doing rapid prototyping of perfectly symmetrical and dimensionally accurate fuselages and assemblies with carbon fibers, aluminum, and fiberglass. 
P/N 13-03707 ..................$39.95

CHOOSE YOUR HOME BUILT “THE ONE YOU’LL FINISH AND FLY!” (KENNETH ARMSTRONG) – Helps answer the three crucial builder questions: Can you build it, can you fly it, and can you afford it? Chapters describe the relative merits of kits, plans, and materials packages, as well as what to ask the manufacturer and what to consider when buying a completed homebuilt. Other sections include a comprehensive section on engines, auto gas and avionics, plus pilot reports on 22 homebuilt designs including photos and specifications. 325 pages. 
P/N 13-31113 ..................$18.95

YOU WANT TO BUILD AND FLY A WHAT? (DICK STARKS) – This is the boisterous, very funny, wildly exaggerated true story of Dick Starks, a math teacher who goes through the agonies and delights of learning to fly, buys an old Cessna, and then goes on to build a replica of a Cessna 177RG jetport fighter. A great book about the fun of flying and the joy of sharing that fun with family and friends. 
P/N 13-15170 ..................$15.95
