MODERN PROPELLER AND DUCT DESIGN – This book tells you the theory of propeller aerodynamics and how to size a propeller. The program allows you to optimize a propeller for a given horsepower and airspeed. Variables such as number of blades, pitch, airfoil, thickness, air density, thrust coefficient, prop efficiency, and airspeed are all explained. Discussion of various prop materials and duct theory is also included. (Martin Hollman) P/N 13-15175............$61.75

STRESS WITHOUT TEARS (TOM RHODES) – This is a primary discussion, not an advanced text by an experienced aircraft stress analyst. Math and other theory is introduced, but only as necessary to master the subject matter. Stress analysis is presented in as simple terms as possible without complex scientific jargon and is done so in a readable and enjoyable manner.

P/N 13-15180 .............$24.95

ANATOMY OF A SPIN – This thoroughly researched and documented text provides insight to all the major spin categories; upright, inverted, single and multi engine. Recovery techniques vary with aircraft design. Learn why ailerons may be of help in spin recovery, why some aircraft spin readily while others are reluctant to spin.

P/N 13-02080 ...............$8.55

MOUNTAIN FLYING – Organized to follow the sequence of typical flight, the book preflight, takeoff, enroute, arrival procedures, and landing. The author discusses fuel management, the magnetic compass, the effects of high-altitude on weight and balance, and the airspeed indicator.

P/N 13-02082 ...............$16.95

THE ORIGINAL GRAND CANYON AIRPORT – Every chapter is illustrated with images of Ford Trimotors, Travelairs, and more Golden Age aircraft. Koontz’s original research at the airport during 2005 resulted in a listing on the National Register of Historic Places. Naval Aviator, Rear Admiral Ernest Eugene “Gene” Tissot, Jr. (USN Ret.), shared personal memories and family photographs from his childhood years living at the airport and near Boulder Dam (now Hoover Dam). These stories and most of the photographs have never before been published.

P/N 13-12352 ...................$27.95

INTERNATIONAL AIRCRAFT DIRECTORY AP – Whether you’re a pilot or an aviation enthusiast, the International Aircraft Directory from the editors of Plane & Pilot magazine is sure to have all you’re looking for in an easy-to-use reference tool for checking facts about a particular model, identifying unusual aircraft, and recognizing trends in airplane design. Now in its third edition, the book features detailed descriptions and photographs of more than 500 airplanes from around the world, including single-engine, multi-engine, jet, classic antique, homebuilts, kit-builts, sailplanes, motorgliders, warbirds, and military aircraft flown by civilian pilots. The directory lists airplane performance, attitude instrument flying, and night operations. The helicopter section includes chapters on weight and balance, performance, attitude instrument flying, and night operations.

P/N 13-03444 ..................$14.95

POCKET REF (THOMAS GLOVER) 3RD EDITION – This great little book is a concise all-purpose reference featuring hundreds of tables, maps, formulas, constants & conversions AND it still fits in your shirt pocket! Good where you go! - Pocket Ref • 3rd Edition by Thomas J. Glover • Over 200 new pages and virtually thousands of updates! • Index for information access. • This book has been in print since 1989 and is now in its 3rd Edition. • It has also gone through numerous printings in each edition.

P/N 13-19342 ..................$11.95

FUNDAMENTALS OF SAILPLANE DESIGN – This book, the definitive text on sailplane design, grew out the authors work with the Akafiegs Braunschweig as well as his popular introductory course in sailplane design. To make the material accessible to pilots without an engineering background, an emphasis is placed on physical understanding and visualization. Mathematics is held to a minimum. Because it draws on decades of experience developing the German Akafiegs, the material will help the experienced engineer to quickly develop a practical understanding of the considerations that go into the design of a high-performance sailplane. The design data tables and three-view drawings have been expanded to include entries for over 150 aircraft. CONTENTS: Volume 2

P/N 13-00361 .................$41.75

AVIATION MAINTENANCE TECHNICIANS BOOK (DALE CRANE) – First book of Dale Cranes’ AMT Series, textbooks that were created to set the pace for maintenance technician training and attain a level of quality that surpasses all other maintenance textbooks on the market. The General text covers the airframe section of the FAA’s required curriculum. As the student progresses, specific aviation concerns are addressed, including regulations, mechanic privileges, forms, aircraft hardware and tools. Curriculum meets 14 CFR Part 147 requirements and Subject Matter Knowledge Codes from the FAA’s mechanics knowledge tests. Include full-color charts, tables and illustrations throughout, in addition to an extensive glossary, index, and additional career information. A study guide is included within each textbook in the form of Study Question sections, with at the end of each text section. Study questions are all-inclusive — no separate, inconvenient workbook is needed by the student or instructor. Hardcover, 828 pages, illustrated, indexed.

General textbook .......... P/N 13-00574 ........$49.95
Airframe vol. 1 .......... P/N 13-00581 ........$34.75
Airframe vol. 2 .......... P/N 13-00582 ........$44.50
Powerplant .......... P/N 13-00583 ........$52.50

EVERYTHING EXPLAINED FOR THE PROFESSIONAL PILOT BOOK – 430 pages (8 1/2 x 11) crammed with virtually every scrap of information essential and necessary for every pilot. All that knowledge you wish you could have at your fingertips all the time, and many things you never even thought about. Fun to read and yet excruciatingly detailed. The ultimate reference book that explains all aspects of aviation from props to heavy jets

P/N 13-03231 ...............$52.95

THE $100 HAMBURGER – A Guide To Pilots’ Favorite Fly-In Restaurants - The burger is back and juicier than ever! This new edition of the little book private pilots live and eat by, features over 1,000 pilot-recommended places to land for that meal at the end of the flight. The author rates restaurants in all 50 states and even includes 6 foreign locations including France, England and Germany. Just what every pilot needs to plan a fun outing in the plane and get some good food too! All reviews are from fellow pilots who’ve actually been there, chowed down, and awarded each place from one to five “burgers”. Tells everything, location, service, price, transportation, dress codes & hours of operation.

Book .......... P/N 13-03454 ..........$36.50
E-Book ........... P/N 13-09835 ..........$23.50

TURBINE PILOT’S FLIGHT MANUAL (BY GREGORY BROWN AND MARK HOLT) – Truly a text designed to help move the aspiring professional pilot up into the turbines. The book basic yet thorough approach makes no assumptions about the reader’s prior knowledge on the subject. P/N 13-00637 ..........$38.85

ASA HELICOPTER FLYING HANDBOOK - The Basic Helicopter Handbook (Advisory Circular 61-38) has been rewritten and renamed the Rotorcraft Flying Handbook. Written for the applicant preparing for the private, commercial, or flight instructor certificate with a helicopter or gyroplane class rating, the book is invaluable to flight instructors as a teaching aid. Both aeronautical knowledge and skill for operating rotorcraft are covered. The book is broken into 2 sections: One dedicated to helicopters, and another dedicated to gyroplanes. Each section includes chapters covering aerodynamics, flight controls, systems, the rotorcraft flight manual, flight maneuvers, emergencies, and aeronautical decision making. In addition, the helicopter section includes chapters on weight and balance, performance, attitude instrument flying, and night operations.

P/N 13-00739 ...............$13.95

THE AEROELECTRIC CONNECTION - A Guide to Theory, Operation, Design and Fabrication of Aircraft Electrical Systems, Revision 12. Written by Bob Nuckolls with over 50 years of hands-on experience in electronics and aircraft electrical systems, 804 pages of 18 chapters plus Appendix D are topped off with a discussion of the poor man’s approach to system reliability. Appendix D offers dozens of variations for tailoring an electrical system to the builder’s project and mission requirements.

P/N 13-00413 ..........$19.85

THEY CALLED ME MR. BONANZA – How it all started in 1944; the original Bonanza design team and their early efforts to find the ideal airplane for the postwar market; how and why the V-tail was chosen; Experimental power plants, first flight wind tunnel testing; Staggering influence; birth of the Debonaire; why the V-tail, airplane genealogy chart. Spec on all models from 1946-1972.
