

EcoPoxy Resin and Clear Hardener is a 100% solids crystal clear epoxy laminating systems.

Our **Clear Kits** are intended for sealing or clear-coating surfaces, such as concrete and wood. You can also use them to wet fabrics that require a clear, waterproof finish. Odorless and non-toxic, **Clear Kit** can be applied indoors or outdoors without masks or ventilation. It is a self-levelling kit that you can easily roll to a 10ml thickness, giving it a durable, light-reflective finish. **Clear Kit** does not shrink and is resistant to water, acids, and other solvents, so it won't peel, flake, or chalk when properly applied. The most common applications include commercial and residential concrete floors, such as warehouses and basements.

EcoPoxy Resin and Clear Hardener is a 100% solids crystal clear epoxy laminating systems for extreme performance and demanding visual applications.

KEY FEATURES

- No Toxic Organic Compounds or Heavy Metals
- 100% Solids, Low VOC, Low odor
- 100% waterproof
- Excellent chemical resistance and hardness
- High adhesion
- Good clarity and gloss retention
- Low viscosity
