

Safety Data Sheet

MSDS 45 Revision G 25/01/2016

SECTION 1: Product and Company Identification

ACR Electronics, Inc., 5757 Ravenswood Rd., Ft. Lauderdale, FL. 33312 USA

PHONE: (954)-981-3333 FAX: (954)-961-4403 INTERNET: www.acrelectronics.com

E-MAIL: msds@acrelectronics.com

Hours of Operation: 9am to 5pm Mon. through Fri.

EMERGENCY 24-HOUR TELEPHONE NUMBERS: CHEM-TEL, INC, Inside U.S. (800) 255-3924, Outside U.S. (813) 248-

0585 and FAX (813) 248-0582 see www.chemtelinc.com for more information about Chem-Tel, Inc.

Primary Batteries SHIPPING NAME LITHIUM METAL BATTERIES

Battery (Li-SO2 Two 1/2AA Cell Pak): AA0715-001

Battery (Li-SO2 One battery pack. Each pack contains two D size cells)

A3-06-2794(ELT 3000); 452-6504-1(ELT 1000); 2714.4 & 2714.91(Pathfinder 3 Replacement Battery)

1069(RLO 43 Raft Light)

1096, 1098, 1098.1 Battery (Li-SO2 One battery pack. Each pack contains three D size cells)

Batteries Contained in Equipment SHIPPING NAME LITHIUM METAL BATTERIES CONTAINED IN EQUIPMENT

Battery (Li-SO2 One battery pack. Each pack contains two D size cells) **ELT 3000**; A**3-06-2749**(ELT 1000)

2714 Pathfinder 3; **2716** TelluSART MK3

The listed lithium metal batteries meet the requirements of the UN Manual of Tests and Criteria, Part III subsection 38.3. In addition, each shipment must be accompanied by appropriate documentation and the package must be capable of withstanding the drop test requirements.

SECTION 2: Hazards Identinfication

Do not short circuit, recharge, puncture, incinerate, crush, immerse, force discharge or expose to temperatures above the declared operating temperature range of the product. Risk of fire or explosion. The Lithium-Sulfur dioxide batteries described in this Product Safety Data Sheet are sealed units which are not hazardous when used according to the recommendations of the manufacturer.

Under normal conditions of use, the electrode materials and electrolyte they contain are not exposed to the outside, provided the battery integrity is maintained and seals remain intact. Risk of exposure only in case of abuse (mechanical, thermal, electrical) which leads to the activation of safety valves and/or the rupture of the battery containers. Electrolyte leakage, electrode materials reaction with moisture.

SECTION 3: Composition & Information on Ingredients

Each cell consists of a hermetically sealed metallic container containing a number of chemicals and materials of construction of which the following could potentially be hazardous upon release.

Ingredient	Content	CAS No.	CHIP Classification		assification
Lithium (Li)	< 3.0%	7439-93-2	*		F; R14/15 C ; R34 R14/15, R21,R22, R35, R41, R43 S2, S8, S45
Acetonitrile (CH₃CN)	< 9%	75-05-8			F; R11, R14/15, R21, R22, S2, S8, S24, S26, S36, S37, S45

Safety Data Sheet

Revision G

25/01/2016

Ingredient	Content	CAS No.	CHIP Classification		
Sulfur dioxide (SO ₂)	< 30%	7446-09-5	**		R22, R36/37, R41, S2, S8, S22, S24, S26, S36, S37, S45
Lithium Bromide (LiBr)	2.0 – 2.5%	7550-35-8			NONE KNOWN
Carbon (C _N)	6.5 – 7.0%	1333-86-4			NONE KNOWN

SECTION 4: First Aid Measures			
Inhalation	Remove from exposure, rest and keep warm.		
Illialation	In severe cases obtain medical attention.		
Skin Contact	Wash off skin thoroughly with water. Remove contaminated clothing and wash		
Skill Colltact	before reuse. In severe cases obtain medical attention.		
Eve Contact	Irrigate thoroughly with water for at least 15 minutes.		
Eye Contact	Obtain medical attention.		
Ingestion	Wash out mouth thoroughly with water and give plenty of water to drink.		
Ingestion	Obtain medical attention.		
	All cases of eye contamination, persistent skin irritation and casualties who		
Further Treatment	have swallowed this substance or been affected by breathing its vapours		
	should be seen by a Doctor.		

SECTION 5: Fire Fighting Measures				
CO ₂ extinguishers or, even preferably, copious quantities of water or water-based foam can be used to cool down burning Li-SO ₂ cells and batteries, as long as the extent of the fire has not progressed to the point that the lithium metal they contain is exposed (marked by deep red flames). Do not use for this purpose sand, dry powder or soda ash, graphite powder or fire blankets.				
Use only metal (Class D) extinguishers on raw lithium.				
Use water or CO ₂ on burning Li-SO ₂ cells or batteries and class D fire extinguishing agent only on raw lithium				

SECTION 6: Accidental Release Measures

Remove personnel from area until fumes dissipate. Do not breathe vapors or touch liquid with bare hands.

If the skin has come into contact with the electrolyte it should be washed thoroughly with water.

Sand or earth should be used to absorb any exuded material, seal leaking battery and contaminated absorbent material in plastic bag and dispose of as Special Waste in accordance with local regulations.

Safety Data Sheet

Revision G

25/01/2016

SECTION 7: Handling and Storage				
Handling Do not crush, pierce, short (+) and (-) battery terminals with conductive (i.e metal) goods. Do not directly heat or solder. Do not throw into fire. Do not r batteries of different types and brands. Do not mix new and used batteries. batteries in non conductive (i.e. plastic) trays.				
Store in a cool (preferably below 30°C) and ventilated area, away from sources of heat, open flames, food and drink. Keep adequate clearance walls and batteries. Temperature above 90°C may result in battery leal rupture. Since short circuit can cause burn, leakage and rupture hazard batteries in original packaging until use and do not jumble them.				
Other	Lithium-Sulfur dioxide batteries are not rechargeable and should not be tentatively charged. Follow Manufacturers recommendations regarding maximum recommended currents and operating temperature range. Applying pressure on deforming the battery may lead to disassembly followed by eye, skin and throat irritation.			

	SECTION 8: Exposure Controls & Personal Protection				
Occupation	al exposure	Compound	8hr TWA	15min TWA	SK -
standard		Sulfur (Sulphur) dioxyde	1 ppm	1 ppm	=
	Respiratory protection	In all fire situations, use self-contained breathing apparatus.			
THE STATE OF THE S	Hand protection	In the event of leakage wear butyl rubber gloves.		-	
	Eye protection	Safety glasses are recommended during handling			
	Other	In the event of large, wear chemical apron.			

	SECTION 9: Physical and Chemical Properties		
Appearance	Cylindrical or prismatic shape		
Odor	If leaking, gives off a pungent corrosive odor.		
pH Not applicable			
Flash Point Not applicable unless individual components exposed			
Flammability	Not applicable unless individual components exposed		
Relative density	Not applicable unless individual components exposed		
Solubility (water) Not applicable unless individual components exposed			
Solubility (other) Not applicable unless individual components exposed

SECTION 10: Stability and Reactivity				
Product is stable under conditions described in Section 7.				
Conditions to avoid Heat above 70°C or incinerate. Deform. Mutilate. Crush. Pierce. Disassemble Recharge. Short circuit. Expose over a long period to humid conditions.				
Materials to avoid	Oxidising agents, alkalis, water.			
Hazardous decomposition Products	Hydrogen (H ₂) as well as Lithium oxide (Li ₂ O) and Lithium hydroxide (LiOH) dust is produced in case of reaction of lithium metal with water.			

	SECTION 11: Toxicological Information				
Signs & symptoms	None, unless battery ruptures. In the event of exposure to internal contents, corrosive fumes will be very irritating to skin, eyes and mucous membranes. Overexposure can cause symptoms of non-fibrotic lung injury and membrane irritation.				
Inhalation	Lung irritant.				
Skin contact	Skin irritant				
Eye contact	Eye irritant.				
Ingestion	Tissue damage to throat and gastro/respiratory tact if swallowed.				
Medical conditions generally aggravated by exposure In the event of exposure to internal contents, eczema, skin allergies, luinjuries, asthma and other respiratory disorders may occur.					

SECTION 12: Ecological Information				
Mammalian effects None known if used/disposed of correctly.				
Eco-toxicity	None known if used/disposed of correctly.			
Bioaccumulation potential	None known if used/disposed of correctly.			
Environmental fate	None known if used/disposed of correctly.			

SECTION 13: Disposal Considerations

Lithium batteries are best disposed of as a non-hazardous waste when fully or mostly discharged. The Federal Environmental Protection Agency (EPA) (governed by the Resource Conservation and Recovery Act (RCRA)) do not list or exempt Lithium as a hazardous waste. However, if waste lithium batteries are still fully charged or only partially discharged, they can be considered a reactive hazardous waste because of significant amounts of un-reacted lithium in the battery. The batteries must be neutralized through an approved secondary treatment facility prior to disposal as a hazardous waste (as required by the U.S. Land Ban Restrictions for the hazardous and Solid Waste Amendments of 1984.) Secondary treatment centers receive these batteries as manifested hazardous waste under code "D003 - reactive." Use a professional disposal firm for disposal of mass quantities of un-discharged lithium batteries.

DO NOT INCINERATE or subject battery cells to temperatures in excess of 212°F. Such treatment can cause cell rupture.
