

# First. Again.

Introducing FlightLink, the first in-flight cockpit recording application for the Apple iPad and iPhone. The free FlightLink app works seamlessly with newer Lightspeed Zulu.2 headsets to capture and retrieve incoming and outgoing communications.

Store multiple flight recordings on your device or iTunes account, and enjoy instant playback of Air Traffic Control transmissions. On the iPad, draw notes on the large scratchpad. Easily toggle from other apps to access recordings and notes.

## Key Benefits

- Never miss a vital transmission while in flight
- Immediate replay of ATC calls
- Draw or erase notes or diagrams on the scratchpad with your fingertip
- Permanent archive of all flight communications for post-flight briefing and training
- Valuable tool for flight training at all levels by capturing the intercom communication of instructional flights
- Easily register your Lightspeed headset and receive timely notices of updates, special offers and invitations from Lightspeed

## Key Features

**Record** all activity over the intercom, including in-bound and out-bound transmissions as well as in-cabin conversation.

**Playback** is instantaneous and user-selected. Listen to the prior two seconds or two minutes.

**Store** your recording library on your iPhone, iPad, or iTunes account.

**Draw notes**, codes, or diagrams on the convenient scratchpad for reference.

FlightLink **works seamlessly** with newer Lightspeed Aviation Zulu.2 headsets. Older Zulu.2 headsets may qualify for a factory installed retrofit at a nominal fee. For more information on a retrofit, contact Lightspeed Customer Care by calling 800.332.2421 or email [service@lightspeedaviation.com](mailto:service@lightspeedaviation.com).

## It all starts with Zulu.2

Zulu.2 once again sets the standard by which all premium Active Noise Reduction headsets are measured. Lightspeed engineers developed technology providing focused noise attenuation over the most critical frequency ranges. The result is a headset with the ultimate performance profile and industry-leading total noise cancellation attributes.

Zulu.2's innovative Lightcomfort design offers exceptional fit, plush ear seals and less side pressure, providing a new standard for comfort and wearability. Zulu.2 offers greater ANR consistency and quieting performance over a deep, broad range of low frequency noise.

Zulu.2's full-function Bluetooth connectivity provides enhanced sound quality for voice, Bluetooth-enabled phones, streaming stereo music or compatible audio devices. The volume of any auxiliary device is automatically lowered during radio or intercom transmissions thanks to the patent-pending ComPriority function. Adding the free FlightLink app ensures you never miss important radio communications.

## About Lightspeed Aviation

Lightspeed Aviation is a leading manufacturer of premium aviation headsets. Since the first product was introduced at the Oshkosh AirVenture in 1996, the company has established a reputation for leading innovation in the aviation headset marketplace with a number of "first to market" advances, technologies, and features. This has earned Lightspeed an outstanding reputation and loyal customer following.

Additionally, the company creates shared values with both employees and customers by generously participating in corporate charity matching programs and through its funding of the Lightspeed Aviation Foundation, which supports growth, awareness, and compassion related causes with an aviation focus.
