ResQLink™ View

MULTI-TERRAIN PERSONAL LOCATOR BEACON WITH DIGITAL DISPLAY

With three levels of integrated signal technology – GPS positioning, a powerful 406 MHz signal, and 121.5 MHz homing capability – the ResQLink View quickly and accurately relays your position to a worldwide network of search and rescue satellites. Additionally, a built-in strobe and infrared strobe facilitate nighttime, or other low visibility, rescues.

Wherever your adventure takes you, whether it's a trip to the highest mountain peaks, the most undiscovered terrain, or the vastest of oceans, rest assured that the ResQLink View always activates easily. Simply deploy the antenna, press the on button, and the beacon will do the rest for you by effortlessly guiding rescuers to within 100 meters or less of your position. Enjoy added peace of mind using the integrated digital display to view live beacon status and GPS coordinates throughout the rescue process.

Due to innovative design elements, multifunction clips can be used in conjunction with the beacon, providing numerous wearability options that address a variety of usage applications.

The increased ease of incorporating the ResQLink View on your person, or with your gear, just made all your adventures not just safer, but more convenient too.

As a leader in life-saving products for both professional and recreational use, ACR provides unparalleled safety and peace of mind with the ResQLink View Personal Locator Beacon.

Included Multi-Terrain Accessory Kit makes the ResQLink View highly adaptable!

Small and Light Weight

Worldwide Coverage

Built-in Buoyancy

Integrated Infrared Strobe & Strobe System

- Cospas-Sarsat
- RED (Pending)
- FCC
- AMSA (Pending)
- Canada (Pending)

**Based on test report from accredited laboratory

*Make sure the antenna is pointing towards the sky, out of the water. Beacon is not intended to operation in water. While the unit is waterproof, it must be above the water's surface to function properly. Intended operational environments include on ground, above ground, and held in hand. In all cases, the beacon must be facing skyward with the antenna perpendicular.
