<b>SECTION IV – FIRST AID MEASURES</b>	
<b>SKIN CONTACT</b>	N/A
<b>EYE CONTACT</b>	N/A
<b>INHALATION</b>	N/A
<b>INGESTION</b>	N/A
In general, life vests present no hazards that would require first aid measures.	
<b>SECTION V – FIRE FIGHTING MEASURES</b>	
<b>Flammable:</b> <input type="checkbox"/> No <input checked="" type="checkbox"/> Yes - identify under which conditions	Life vest may ignite and burn if exposed to flame.
<b>Means of Extinction</b>	Large volumes of water, chemical fire extinguisher, sand.
<b>Special Fire Fighting Procedures:</b>	N/A
<b>Flashpoint (°C) and Method</b>	N/A
<b>Upper Flammable Limit (% by volume)</b>	N/A
<b>Lower Flammable Limit (% by volume)</b>	N/A
<b>Autoignition Temperature (°C)</b>	Auto Ignition > 175 °C (350 °F)
<b>Explosion Data - Sensitivity to Impact</b>	N/A
<b>Explosion Data - Sensitivity to Static Discharge</b>	N/A
<b>Hazardous Combustion Products</b>	May form harmful fumes under fire conditions. Use air-ventilated full mask and full protective clothing when fighting fires.
<b>SECTION VI – ACCIDENTAL RELEASE MEASURES</b>	
<b>Leak and Spill Procedures</b>	Hazardous materials are contained in sealed units within packed life vests. Spills should pose no threat if the sealed units are not breached. If compressed gas cylinder ruptures, ventilate area. Ignition sources must be avoided. Handle materials with care.
<b>SECTION VII - HANDLING AND STORAGE</b>	
<b>Handling Procedures and Equipment</b>	Do not drop or crush the packed life vest. Do not pull the inflation tab on the vest. Opening the package and unpacking the vest may cause it to inflate. Life vest can cause injury if inflated close to people or in a confined area. Prolonged exposure to moisture may cause water activated lights on some vests to discharge and give off a non-hazardous "rotten egg" smell. Fully ventilate the area. On vest models equipped with water activated inflation systems, prolonged exposure to moisture, high humidity, or fog can cause the vest to inflate by itself without warning.
<b>Storage Requirements</b>	These units should be stored in a cool, dry area away from danger of sparks, heat or flame.
