## Instructions for Switchbox 26 10

Disclaimer: Use this Switchbox at your own risk. This device contains electrical switches (Max Total Power 1800W), which activate and Power On/Off connected electrical devices. Text Messages control these connected devices, and sustain or interrupt continuous power to them. Improper operation can cause damage to the Device(s), Switchbox or User(s). Switchbox Control will not be held liable for any damage caused by this product.

**NOTE: The Switchbox must be activated upon first use. Please check out for the service at the link here https://www.switchboxcontrol.com/all-products/switchbox-ultra-service-plan and then install our app for Apple or Android. Next, login with the same email from ordering your service and use password 123456. You will see a SIM Activation button in your app for scanning the sim card on the bottom of your device. Scan this card and the app will populate the new unique # for your active device. For any questions, please contact us for extra assistance. support@switchboxcontrol.com**

---

**Switchbox Ultra SIM Card**

Monthly charge for Switchbox Ultra SIM service is available on our website under Switchbox Ultra SIM credit and service. If the account does not have enough funds, the sim card will become deactivated. If this occurs, visit our website to purchase a new Switchbox Ultra SIM card.

---

**Operating Directions**

You can download the 'Switchbox Control' App on your Iphone, Ipad or Android device in the Apple or Google App Stores for free. Your default app password is 123456 and can be configured easily using the steps found in our setup video here https://youtu.be/k8sqvRxPn04

---

**Wired Antenna – 10' Extension**

Users that operate in poor reception areas and/or need added reach to the outside of their location can use the optional 10' wired antenna with magnetic base. Mount the wired antenna as high above the Switchbox as possible, for best reception.
