For anyone who would like to review the FAA's Airplane and expands all technical subject areas from the previous edition.

Licensed pilots. This new edition features full-color illustrations, and flight instructors engaged in the instruction of both students and those pilots wishing to improve their flying proficiency and aeronautics. Book ................. P/N 13-010229 .................. $17.85
E-Book ................ P/N 13-05914 .................. $18.95

The best way for private pilots with limited means to obtain the plane of their dreams is to purchase a used one – and there’s no better way to buy one without getting burned than this heavily illustrated guide. Focusing on airplanes priced at $100,000 or less, the author walks readers through the entire process of purchasing a used plane: prospecting the market, determining a plane’s true value, closing the deal, partnership, and much more. Author: Bill Clarke......................... P/N 13-07716 .................. $54.95

The Illustrated Buyer’s Guide to Used Airplanes

The best way for private pilots with limited means to obtain the plane of their dreams is to purchase a used one – and there’s no better way to buy one without getting burned than this heavily illustrated guide. Focusing on airplanes priced at $100,000 or less, the author walks readers through the entire process of purchasing a used plane: prospecting the market, determining a plane’s true value, closing the deal, partnership, and much more. Author: Bill Clarke......................... P/N 13-07716 .................. $54.95

Powered Parachute Handbook E-Book - Here the pilot is shown the realm of powered parachute flight and given information and guidance in the performance of procedures and maneuvers required for powered parachute certification. This book is the official FAA source for learning to fly powered paragliders and many test questions for the powered parachute knowledge Exam come from this reference. Illustrated throughout with full-color graphics and photography.

E-Book ................ P/N 13-05900 .................. $21.95

Advanced Avionics Handbook - The Federal Aviation Administration’s Advanced Avionics Handbook is a technical tool for anyone seriously interested in flying modern airplanes. This easy to read handbook introduces pilots and other readers to flight operations in aircrafts with the latest integrated “glass cockpit” advanced avionics systems. Critical topics covered include: which advanced avionics system to use and when, automated flight control, advanced weather data systems, area navigation, primary flight display failures, and more. With the interactive CD included, the Advanced Avionics Handbook is the perfect guide for translating raw scientific data into critical flight intelligence.

Book ................... P/N 13-11596 .................. $12.95

Close Calls: Lessons to Live By - Aviation masters, Bob Hoover and Wayne Handley share the wisdom gained from more than 50,000 hours of combined flying experience, often in extreme conditions. Each of them share how they survived near-impossible-to-escape in-flight emergencies by applying simple safety principles.

Book ................... P/N 14-02173 .................. $19.95

Flying the Tailwheel Airplane

Also aims to identify common habits that cause poor pilot performance, and suggests “key points”, memory aids, that help develop better pilot habits. The principles laid out in the book are applicable to all pilots flying all types of small airplanes, and are prerequisite to learning to fly advanced maneuvers safely. The book offers an abundance of photographs from the cockpit demonstrating key points and principles from the pilot’s perspective. Emphasis on where to look, what to see and what to do about it makes this teaching style and book unique and effective.

Book ................... P/N 13-11803 .................. $24.95

Advanced Aerobatics

In this lesson-by-lesson guide, accessible text from aerobatics champions, sequential cockpit-view photographs, and sophisticated computer graphics provide an effective primer on 20 advanced aerobatics maneuvers.
