KITPLANES MAGAZINE – Add the current issue of the popular homebuilders magazine to any order. We also have some back issues available on request. Most recent issue published will be shipped. P/N 13-31110 ........... $5.00

EAA SPORT AVIATION – EAA Sport Aviation Magazine – EAA Sport Aviation Magazine is now better than ever. More feature stories, more photos, more how-to, hands-on, build-yourself-content, more about flying, and so much more! Current Edition P/N 13-11642 ........... $4.95
12 Month Subscription P/N 13-11643 ........... $45.00

27 YEARS OF THE RV-ATOR (ANDREW GOLD) – An outstanding collection of newsletter reprints of Van’s Aircraft line of RV homebuilts. A must for any builder of RV homebuilt aircraft. Book P/N 13-25450 .............. $22.50

THE COMPLETE ADVANCE PILOT: A COMBINED COMMERCIAL & INSTRUMENT COURSE (BY BOB GARDNER) – Chapter cover such topics as flight instruments, aerodynamics, airplane performance, navigation, weather, charts and publications, the IFR system and departures, en route operations, arrivals, instrument approach, and the instrument landing system. A manual on health and safety techniques written by an aviation medical examiner and training and repair station manager. A manual on health and safety techniques written by an aviation medical examiner specifically for the aviation technician. Learn how to protect yourself from the many risks and long term health issues common in an aviation facility. Learn to advise and protect your most valuable assets (your employees and students). P/N 13-19044 .......... $15.95

ADVANCED AIRMANSHIP BOOK 1 PRECISION FLYING – This is the first of the three part Advanced Airmanship Series. In this series, Professional Kumpula summarizes his 30 years of experience researching the aerodynamics of flight technique into clear explanations and procedures. Computer based flight simulation demonstrations and specialized tools substitute for conventional mathematical explanations and are included on a CD. P/N 13-07350 .......... $29.95

AN ILLUSTRATED DICTIONARY OF AVIATION - An A-Z compendium of definitions, and illustrations from the general aviation, commercial airline, and military sectors. It can be used as a dictionary, reference, or learning tool. P/N 10-27746 .......... $144.75

POWERING YOUR PLANE – “Powering Your Plane” is a book that will help readers correctly install a Lycoming-type engine. It covers each step of the engine installation process, including selecting an engine for your project, firewall construction, plumbing, electrical, preparing for your first engine start and more. By focusing just on Lycoming and Continental engines, the author is able to go into great detail about the types of engine installations that most builders use. P/N 13-04709 .......... $23.95

FLIGHT INSTRUCTORS SURVIVAL GUIDE- Through artful storytelling, McMahon shows how a successful instructor is sometimes a psychologist, other times a detective, and always a gatekeeper enforcing rules and cultivating the behaviors required to be a responsible aviation citizen. P/N 13-20136 .......... $14.55

MASTERING THE E-6B FLIGHT COMPUTER - Mastering the E-6B Flight Computer launches with this history of the humble yet elegant flight computer before delving into a thorough tutorial on its use. Chapters include questions taken from the FAA test with web addresses, found throughout the book, are new to the Third Edition. P/N 13-01714 .......... $22.95

AIRCRAFT GAS TURBINE POWERPLANTS - Newly revised to include the most up-to-date information on aircraft gas turbine powerplants and updated coverage of jet engine technology. Excessive cross-reference between today aircraft and engines. Now includes over 500 illustrations, charts and tables. Written by Otis & Vosbury. 514 pages. P/N 13-02421 .......... $22.95

THE AVIATRIX - The Aviatrix is a candid, sometimes funny, definitely scary but totally behind, behind the scenes, first-hand look into the process of becoming a pilot. Kim tells you what most pilots, especially men won’t dare whisper. She explains terms, concepts and procedures in a way that even a blond could grasp. And when you’re finished reading The Aviatrix you’ll feel as though you can do something you never thought you could; just like Kim. P/N 13-19044 .......... $15.95

TRANITION TO TWINS – YOUR MULTI-ENGINE RATING (by DAVID ROBSON) This is one of the most concise and well-illustrated books on flying twin-engine airplanes, covering all facets of multi-engine flight, including: • Orientation to multi-engine terms, definitions and systems • Pre-flight, ground operations, takeoffs, high speed flight, slow flight, stalling and landings • Single-engine operations, with a comprehensive discussion and practical suggestions on factors affecting controllability, VMC, & performance • Abnormal operations, including fires, engine and system failures, landing gear lock-up, icing, & bird strikes • Flight planning, including weight & balance, and performance calculations • Night & IFR operations • Commercial operations, introducing the factors involved with passengers, crew, cargo, schedules, duty times, and the airman’s required. 220 pgs. P/N 13-00793 .......... $14.95

ADVANCED AIRMANSHIP - This is a “no excuses” book that belongs with every A&P student, mechanic, technician, aircraft builder, repair station library, and to the instructor himself. When Stick and Rudder not only to the learner but also to the accomplished pilot because the basics are largely unchanging, the book therefore is applicable to large aircraft and engines. The true story of pilot Howard Snyder and the crew of the B-17 Susan Ruth is about the dramatic experiences of each member of a B-17 crew after their plane was knocked out of the sky by two German Jabo- Wulf 190 fighters over the French Belgian border. The print edition of the book has more than 200 time period photographs of the people who were involved and the places where their stories took place. P/N 13-18400 .......... $25.95

THE COMPLETE ADVANCE PILOT: A COMBINED COMMERCIAL & INSTRUMENT COURSE (BY BOB GARDNER) – Chapter cover such topics as flight instruments, aerodynamics, airplane performance, navigation, weather, charts and publications, the IFR system and departures, en route operations, arrivals, instrument approach, and the instrument landing system. A manual on health and safety techniques written by an aviation medical examiner and training and repair station manager. A manual on health and safety techniques written by an aviation medical examiner specifically for the aviation technician. Learn how to protect yourself from the many risks and long term health issues common in an aviation facility. Learn to advise and protect your most valuable assets (your employees and students). P/N 13-19044 .......... $15.95

LESSONS FROM THE LOGBOOK - The skills of flight either improve or slowly erode, but they rarely remain unchanged. Lessons from the logbook strives to make sure of the former. It is organized to reflect all the phases of flight, conclude-what to do when you get stuck above or below a cloud deck, and to the instructor himself. When Stick and Rudder not only to the learner but also to the accomplished pilot because the basics are largely unchanging, the book therefore is applicable to large aircraft and engines.
