FLYING IFR, 5TH EDITION (BY RICHARD COLLINS) — A guide to the real world of instrument flight, detailing the IFR system, equipment, and exploring the risks and rewards of instrument flying. The invaluable discussions on instrument airmanship, weather analysis, flight planning and decision making, handling equipment glitches, and that critical survival skill — partial panel flying — are all presented for the sole objective of better preparing you to fly on IFR flight plans. P/N 13-02366 ................ $14.95

FLYING THE WEATHER MAP (BY RICHARD COLLINS) — Following an in-depth discussion of the logic of aviation weather and basic theory, Collins takes you along on 46 actual cross-country flights. The anecdotes provide a valuable education in weather interpretation, forecasting and decision making. Softcover, 234 pages, illustrated, indexed. P/N 13-02385 ................ $14.95

ASA AVIATION MECHANIC HANDBOOK — A core reference manual for mechanics, aircraft owners, and pilots, this book compiles specs from stacks of reference books and government publications into a handy, toolbox-size guide. All the information critical to maintaining an aircraft. P/N 19-02365 ............... $12.95

AERODYNAMICS FOR NAVAL AVIATORS — This textbook presents the elements of applied aerodynamics and aeronautical engineering which relate directly to flight training and general flight operations. Originally published by the U.S. Navy, 432 pages. P/N 13-01060 ............... $16.95

ASA AVIATION WEATHER — All pilots must learn to deal with weather; to appreciate good weather, to recognize and respect marginal or hazardous weather, and to avoid violent weather. Recognition of this and sound weather decisions are critical to the successful outcome of all flights. This book discusses each aspect of weather as it relates to aircraft operation and flight safety. Softcover Book .......... P/N 13-01062 ........... $8.95 EBundle ................. P/N 13-21252 ........ $13.95

ASA AVIATION WEATHER SERVICES - Last revised in 1999, this new Advisory Circular 00-45F edition superseded AC 00-45E, features full-color illustrations throughout, and full coverage of weather-related tools to assist every pilot's maintenance, transitioning from tricycle gear, more. 96 pages. P/N 13-10229 ................ $17.95

AVIATION WEATHER COMBO PACK — Aviation Weather and Aviation Weather Services are packaged together for greater savings. Also includes laminated weather code key cards, detailing the TAF/METAR abbreviations. P/N 13-02341 ............... $27.75

TAMING THE TAILDRAGGER (JOHN F. BALL) — A flight manual for tailwheel aircraft; basic enough for the student pilot, thorough enough for the advanced. Includes performance figures and limitations for the classic planes, plus techniques and procedures for short-, soft-field operations, maintenance, transitioning from tricycle gear, more. 96 pages. Paperback P/N 13-27100 ........ $13.95

MAKING PERFECT LANDINGS IN LIGHT AIRPLANES (RON FOWLER) — No matter how long you have been a pilot and no matter what degree of skill you have attained, if you are to land perfectly you must exert 100% effort toward that task. Many pilots resign themselves to imperfect landings merely because they are unaware of the simple fact that even the pros must work at each landing. P/N 13-23500 .............. $14.95

THE LOST ART — An action adventure/instructional novel that leads deep into the tailwheel underbelly to reveal long-hidden ancient secrets of tailwheel flying. P/N 13-16381 ................ $19.95

MAX TRECSCOTT’S GPS & WAAS INSTRUMENT FLYING HANDBOOK - Recognizes that GPS is at the center of modern cockpits and not just add-on equipment. If you fly VFR or IFR with a panel-mounted GPS, you're bound to learn something you didn't know from my latest book about GPS, WAAS, or opening your GPS receiver. It's a totally new book—NOT a new version of my G1000 book—that tells you what you need to know to safely operate modern GPS systems including details of step-by-step instructions for the Bendix/King KLN 94, Garmin GNS 430, 430W, 480, 530, 530W and G900X, G1000 and Perspective glass cockpits. P/N 13-06934 .............. $42.95

SUNSET TO SUNRISE - Sunset to Sunrise by David Robson is one of the most pleasant forms of flight every city looks good at night. The sparkling lights, stars, moon and reflections combine to produce a spectacle many only dream about. However, night flight requires different technique, perspective, and considerations than day operations. The aircraft must be flown with reference to the flight instruments, and the outside visual references take on new importance while at the same time providing different illusions. Night flight can be a test for even the most experienced pilot. P/N 13-03285 ................ $14.95

INSTRUMENT PILOT FLIGHT MANEUVERS — Provides a thorough explanation of each maneuver and task called for in the FAA’s Instrument Practical Test Standards (PTS). The latest update improves upon its sound platform with even more information for the pilot seeking an instrument rating. Both the 1998 and oral PTS are included so that the manual reflects the current standards you will encounter during the checkride. In the intervening years, the FAA has changed some terminology in the PTS, and this fine-tuning is also present in this, the third, edition of the manual. With GPS and RNAV navigation much more commonplace, these inclusions have also been made by the FAA. In addition to the technical changes, the publisher has also improved the graphics to better illustrate each maneuver, while retaining those maneuvers that the FAA had deleted from its Instrument Flying Handbook for greater depth. A cross reference of applicable FAA publications to each maneuver and task helps with further research. The spiral-bound manual is easy to use, clipping onto a standard, approach plate-size kneeboard for flight. P/N 13-06733 ................ $25.70

IFR: A STRUCTURED APPROACH EBOOK — For the instrument pilot seeking to upgrade his or her skills, John C. Eckalbar's IFR: A Structured Approach provides compelling insights. Eckalbar, a well-regarded instructor for the American Bonanza Society, offers tips for "flying by the numbers" and specific procedures (power settings, airspeeds, and descent rates) for flying GPS approaches in particular. If you've been stumped by circling approaches and box patterns, this book has much to say on those topics, as well as a two-part look at mastering the ILS. If one book could help make the leap from a bit player to a skilled conductor of instrument flight, this is it. Ebook - 332 pages. P/N 13-09955 ..................... $31.45

AVIATION MAINTENANCE MANAGEMENT — The complete, up to date guide to managing aircraft maintenance programs. Thoroughly revised for the latest aviation industry changes and FAA regulations, this comprehensive guide to the real world of instrument flight, detailing the IFR system, equipment, and exploring the risks and rewards of instrument flying. The invaluable discussions on instrument airmanship, weather analysis, flight planning and decision making, handling equipment glitches, and that critical survival skill — partial panel flying — are all presented for the sole objective of better preparing you to fly on IFR flight plans. P/N 13-02366 ................ $14.95

CONSTRUCTION OF TUBULAR STEEL FUSELAGES — This book provides step by step instructions on how to construct a perfect tubular steel fuselage. It is the result of hundreds of hours of development in the shop doing rapid prototyping of perfectly symmetrical and dimensionally accurate fuselages and assemblies, without special jigs. P/N 13-03707 ..................... $24.95

AIRLINE PILOT INTERVIEWS - Airline Pilot Interviews, How You Can Succeed In Getting Hired by Irv Jasinski. This completely revised, updated, and greatly expanded edition has over 300 pages, 20 illustrations, sample resumes (military and civilian), and letters (cover, update, and recommendation). With 46 chapters and an extensive index, the reader will receive hundreds of valuable tips and insights into presenting themselves in interviews with major, national, and regional airlines as well as corporations. P/N 14-00709 ..................... $13.95

BEYOND THE CHECKRIDE — Covering the latest FAA regulations, Beyond the Checkride, Second Edition, is packed with invaluable lessons learned by trial and error based on the real-life experiences of hundreds of pilots. Originally written by legendary flight instructor Howard Fried and thoroughly revised by veteran pilot Gene Gailey, this practical resource takes you, step by step, through a flight from the perspective of a flight examiner. Learn from other pilots’ mistakes—it’s easier and safer, and it could even save your life. P/N 13-07597 ..................... $45.00
