#### CESSNA CARAVAN CHAINS AND CABLES
Quality standards exceed the applicable military specifications to produce the safest cables possible. Now these quality cables are available as FAA-PMA direct replacements for the Cessna Caravan 208 and 208B.

- DOD OML 5117 certified cable manufacturer
- Innovative design
- Longer service life
- Refined ball seat eliminates stress concentration
- 17-4 stainless steel increases strength
- Added offset link eliminates binding.

#### CESSNA NOSE WHEEL STEERING ROD BOOT
Cessna steering rod boots to keep out exhaust gases and prevent smoke and fumes from entering the cockpit in the event of an engine fire while tolerating the constant air pulses caused by the rotating propeller. These steering rod boots are manufactured with a black Kevlar/fiberglass blend fabric.

- The fatigue resistance of Kevlar is uniquely mated with the fire resistance of fiberglass. This is a super tough, high temperature fabric that will provide many years of outstanding performance.
- Innovative design
- Longer service life
- Refined ball seat eliminates stress concentration
- 17-4 stainless steel increases strength
- Added offset link eliminates binding.
