# K&N Air Filters

Our K&N Filters are the industry standard in excellence. All filters are constructed with ultra-strong molded pliable rubber flanges which absorb vibration and provide secure attachment. These flanges can be stretched up to 1/8" (3mm) to fit in-between sizes. K&N Universal air filters are available in round, tapered, and oval designs, to fit just about any application. Use the dimensioned sketch and the selection chart to find the filter best suited to your application.

## K&N Air Filters

Rubber end cap instead of chrome makes this filter less likely to create damage in the event of a prop strike. Also includes rubber boss for safety wire attachment.

## K&N Power Kleen

K&N Air Filter Cleaner is the only cleaner recommended to clean K&N Air Filter elements. Dissolves dirt build up and old oil filter and can be washed away with water. It is environmentally friendly and safe on paint, chrome, cast aluminum, plastic, rubber and vinyl when used as directed (do not use on polished or anodized aluminum). Complete instructions on bottle.

## K&N Air Filter Cleaner & Degreaser

This is the only cleaner formulated to clean K&N Filtercharger elements. The use of any other cleaning solution will void the filter’s warranty, and quite possibly could damage the cotton material. Biodegradable and safe on paint, chrome, cast aluminum, plastic, rubber, and vinyl when used as directed. Complete instructions on the bottle.

## K&N Filter Charger Oil

K&N Filter Charger Oil is the only oil specially formulated to work in combination with the cotton fabric in K&N Filtercharger elements, providing a superior air filtration system. When used as directed, it quickly penetrates the filter pleats, where it remains suspended in the cotton fabric. Saturation is maintained until the element is cleaned with K&N Air Filter Cleaner.

## K&N Precharger Filter Wraps

The K&N Precharger® is a specially designed filter wrap made to extend the service interval of your K&N Filter when used in very dusty conditions. They are made from durable polyester material containing uniform micron openings. The Precharger will stop small dirt particles; yet add little restriction to the airflow of the filter. The Precharger is designed to be run dry and can be cleaned with K&N Filter Cleaner. The Precharger is custom made to fit each application. Double stitched elastic openings assure that the Precharger will stay in place. Available in round straight and round tapered.

## VARI-EZE / LONG EZ AIR Intake Filter

NAPA #904 air intake filter (equivalent to Purolator #AFP-177 & AC #44-8C) P/N 2904.............. $14.75
