**ENGINE PREHEATERS**

### RED DRAGON ENGINE PREHEATERS

**E-Z HEAT AIRCRAFT ENGINE PREHEATERS**

Preheating engines for winter operations is at best a miserable chore and at worst can be a disaster for the plane, the pilot & flight operations - until the development of the **E-Z Heat Aircraft Engine Heater.** The E-Z Heat was designed to provide very efficient engine heating for virtually all propeller driven aircraft. The heaters consist of a flexible synthetic pad that easily conforms to the contours of the oil pan. This pad will heat 12 qts of oil from -40° to +60°F in an hour while using approximately 300 watts of electricity. The heater is 1/32" thick, which enables the immediate heat transfer from heater to engine.

**H-125 Cylinder Dolly w/battery bracket and battery clips to quickly attach to your battery source and regulator and excess flow safety P.O.L. tank fitting. Each unit includes a 10' power cord with alligator regulator and excess flow safety features and push button ignition. Safety features include safety shutoff valve, adjustable regulator and excess flow safety P.O.L. tank fitting. Each unit includes a 10' power cord and alligator clips to quickly attach to your battery source and regulator and excess flow safety features.

**Red Dragon Disposable Cylinder Adapter**

**MaxPreheat Pre Heaters**

Extend-A-Stay mode for the Model MPH12VDC or MPH24VDC unit. Designed to allow you extra time on the ground. Once you land, hook up the device per instructions, and you will have many more hours of “on the ground time”. In an emergency this unit can get your engine up to a starting temperature in an hour or so. Coming from a cold engine condition with everything in place as described, this can be an actual life saver. You will need to decide on settings, placements and other parameters based on your local conditions. The system consists of two heater pads connected with a common “Light Bright” power cord. Installation is easy by peeling and sticking a pad on both the sump and on the oil tank to assure the engine gets the proper amount of heat. P/N 07-01866............$149.00
