Spraying UV-blocking chemical — Poly-Spray — Applying the color coats.

Poly-Fiber finishes are required for approval. Poly-Fiber is approved for use on most certified aircraft. To be sure, check the Master Eligibility List in the Poly-Fiber System. It is not approved for certified aircraft except on plywood ailments. Not for painted surfaces.

Note: Formerly known as Stits covering process. Only Poly-Fiber materials may be used through the topcoat paint to comply with STC requirements.

Poly-Fiber Covering Process was documented time tested results by the professionals. The Poly-Fiber Covering Process was issued Supplemental Type Certificate No. SA-1008-WE in 1965 and this number will apply to all aircraft.

The Poly-Fiber Practice Kit

If you’re thinking of building a fabric-covered airplane but are wondering what the covering process is like, this is the perfect answer. You get a practice frame, fabric, tapes, needles, rib lacing cord, thermometer, instructions, and all the tools you need to work through the Poly-Spray stage. There’s enough of everything to do the entire process twice. You’ll see how easy and enjoyable fabric covering really is.

‘HOW TO COVER AN AIRCRAFT USING THE POLYFIBER SYSTEM’

The Official Poly-Fiber how-to manual. It’s a whole covering course in a book. A spiral-bound classroom, as the ads say. 151 pages of clear, non-jargon, step-by-step instruction, the entire Poly-Fiber system, from basic materials to blue ribbon. In plain language & has a sense of humor all its own. Entire Poly-Fiber catalog of products is included.
