**PTI SPECIALTY PAINTS**

**SPECIALITY PAINTS**

**POLYURETHANE - ENAMELS - WATERBORNE**

**POLYURETHANE/CATALYST CURE**

Low VOC - Two component system with built-in U.V. protection. The system has both corrosion and chemical resistance properties with a gloss range > 95%. Comes in all Federal 595C colors. Custom colors available upon request.

**ENAMEL**

PTI’s Enamel is formulated to meet the performance specifications of Federal specification TT-E-489G. This product is a high quality alkyd enamel which performs best when used with PTI's zinc chromate or chromate free primer. It may be applied over wood or metal and is suitable for both interior and exterior applications.

**WATERBORNE POLYURETHANE**

ZERO V.O.C. general purpose, exterior protective coating for metal surfaces. This product also works great for interior applications. The Waterborne Polyurethane should be applied over top of the PTI Wateerborne Epoxy Primer. Available in all Federal 595C colors; custom colors available upon request.

**HOW TO ORDER:**

Add the following dash numbers after the “Part No.” listed in the chart for the size and type desired.

**PTI POLYURETHANE PAINT KIT**

This kit will provide all the materials needed to paint any RV or similar size aircraft. The kit consists of:

- Green Acid Etch Primer & Reducer
- Polyurethane White topcoat, with catalyst & Reducer
- Yellow Epoxy Primer, Catalyst, & Reducer
- Clear coat sold separately

Additional colors are available upon request, for walkways on exterior aircraft surfaces. PTI Wing Walk Coating is a non-slip coating used for walkways on exterior aircraft surfaces. PTI Wing Walk is a rough texture non-slip. The Wing Walk is a unique formulation of high molecular urethane resins, which cures at ambient temperatures. This product is a high performance, two component polyurethane topcoat designed for long-term exterior and interior use on high performance general aviation, business jet, and commercial aircraft.
