SUCTION REGULATORS – PNEUMATIC FILTERS

PARKER SUCTION REGULATOR
Constructed of lightweight aluminum. Large air passages minimize the pressure drop through the valve. Valve chatter is virtually eliminated by pneumatically balancing the regulating diaphragm. The simple but effective polyurethane garter filter protects the air pump and may be easily replaced. Beaded hose fittings simplify installation and eliminate expensive AN fittings which unnecessarily restrict airflow. Has 5/8" x 3/8" Ports (45° elbow)...
