## SOLDERING SLEEVES

One-step, heat-shrinkable wire and cable interconnection device.  
Create strong, soldered connections. Consist of a heat-shrinkable  
sleeve and a premeasured, fluxed solder band. When heated, the tubing  
shrinks and the solder melts, making reliable, insulated terminations.

.300"LG.....P/N 11-04482..... **\$1.42**

## SOLDERING SLEEVES

Termination sleeves consist of a heat-shrinkable, transparent,  
polyvinylidene fluoride sleeve with an inner, pre-fluxed, solder preform  
and two thermoplastic sealing inserts. When heat is applied, the solder  
melts and flows to provide a superior connection between the ground  
lead and the shield. At the same time, the two thermoplastic sealing  
inserts melt and the outer sleeve shrinks to provide an environmentally  
protected termination.

## COLOR CODED CIRCUIT BREAKER CAPS

These color coded caps can easily be installed and  
removed from Klixon and similar type circuit break-  
ers. Colored caps are used to "flag" designated cir-  
cuit breakers for flight check and other purposes.  
In addition, they greatly improve grip. Won't shake  
loose and rattle like others can.
