AVEOFASH LIGHTING

AVEO RED BARON MINI LED LIGHT
The RedBaron™ Mini is a cousin to the RedBaronXP™, the world’s smallest and brightest total coverage LED anticollision light. The new RedBaron Mini™ resulted from requests by high-performance racing aircraft, super lightweight UAVs in the defense industry, and aircraft/helicopter manufacturers who wanted an upper and lower anti-collision light due to mounting area constraints. The answer came in this incredible new light, only 27 mm high and only 110 grams in weight. Exceeding all TSO intensity requirements and all DO-160F environmental requirements, the RedBaron Mini™ is now the world’s smallest anti-collision light.

White .................. P/N 11-10534 .................. $489.00

REDBARONXP™ incorporates 36 of the brightest LEDs available in the world today.
White .................. P/N 11-08423 .................. $576.00

AVEO REDBARON ADAPTER
If you are replacing a Whelen anticollision light, this adapter by Aveo is designed to match up perfectly with your existing mounting site.

Adapter works for following Whelen models: A450 • A470A • 7100806 • 7100807 • 7105050 • 7105051 • 9025001 • 9025051
Specifications: Universal holes (4x1.75” x 4x1.625” x 4x1.25”), Color: Silver
White .................. P/N 11-10631 .................. $737.65

AVEO REDBARON MAXIMINI RECOGNITION LED LIGHT
Introducing the Aveo MaxMini™ - the ultimate recognition light. Spawned from the incredible technology of the incredible and unmatched RedBaron™ AntiCollision series, the new MaxMini™ is the world’s brightest and smallest recognition light, at only 27 mm high and weighing only 85 grams. The MaxMini™ only comes in aviation white led color, since it is 43% brighter than red leds, which means you will BE SEEN.

The MaxMini™, when only the best and the brightest will do. Features include Exclusive Lifetime Warranty, Unbreakable Diamidum™ encapsulation, 9-32 Volt Input Range, Vibration Proof, Waterproof, Lowest Drag Profile recognition light, Anodized aluminum finish, Extremely light weight. ............. P/N 05-04934 ............ $199.00

AVEO MAXX HERCULES LED LANDING / TAXI / WIGWAG LIGHT
Designed for those of you that want your plane to look like a jumbo jet in the pattern, we went to our slumber works and using our AveoMaxChiptm technology, we built you the ultimate landing light. The Hercules™ is nonpareil in the industry as verified by test pilots at major aircraft manufacturers in night runway tests against all our competitors’ lights. Again, featuring the landing, taxi, and wigwag functions, the Hercules™ is also available with TCAS activation for recognition mode.

Voltage input 9 to 32 VDC, please remove legacy strobe boxes first!
30 (Brightest) With Bracket .................. P/N 05-06492 .................. $975.00
30 (Brightest) Without Bracket .................. P/N 11-10638 .................. $975.00
20 With Bracket .................. P/N 05-06493 .................. $825.00
20 Without Bracket .................. P/N 11-10643 .................. $825.00

AVEO MAXX ATLAS LED LANDING / TAXI / WIGWAG LIGHT
Aveo’s most compact 3-mode light featuring landing, taxi, and wigwag recognition functions, the Atlas™ is 2x to 5x brighter than the rest of its industry competitors. With a variety of mounting options that are part of the rear heat sink variations themselves, the Atlas™ also has optional built-in TCAS signal activation to act as an automatic recognition light.

Voltage input 9 to 32 VDC, please remove legacy strobe boxes first!
15 (Brightest) With Bracket .................. P/N 05-06495 .................. $725.00
15 (Brightest) Without Bracket .................. P/N 11-10647 .................. $725.00

AVEO BORG MINI™ CARGO STEP LIGHT
Aveo Borg Mini™ Cargo Step Light. Cargo / Wheel Well / Step LED light For Experimental Use Only.
P/N 11-15179 .................. $229.00

AVEO EYEBEAM MINI
Aveo’s incredible capacitive-sensing technology that has been developed is now available in an even smaller footprint, providing a one-color LED cabin/cockpit/area lighting product for those with limited installation space or only simple lighting needs.

With one light finger touch you can control the power and the intensity scale and the light easily revivisits the beam where you want it. No mechanical switches to fail, no bulbs to burn out. The EyeBeam Mini™ comes with a variety of easily-applied color faceplates, with standard colors of silver and black. The EyeBeam Mini™ is made from anodized aircraft grade aluminum. Cockpit and cabin lighting, especially on aircraft, helicopters, boats, recreational vehicles and trucks are plagued by problems from vibration ... the EyeBeam™ product line from AveoEngineering comes with this vibration-proof product that has the exclusive Aveo lifetime warranty.

Features: • 9-32 volt input range • No mechanical power supply • Swiveling light permits beam control • Capacitive sensing touch controls • No mechanical switches to fail • Exclusive Lifetime Warranty • Unmatched circuit technology.
Silver .................. P/N 11-09678 ............ $227.00
Black .......................... P/N 11-09679 ............ $227.00

AVEO EYEBEAM DOME A
EyeBeam Dome - Touch Control Interior LED Light. The EyeBeam Dome was developed to meet the requests of an interior dome light for all aircraft, that would complement the amazing Aveo EyeBeam products, and their unique touch-controls. Long gone are the days of mechanical switches which can corrode and spark, etc. Available with a remote control finger-slide panel for intensity and operation.
Black .................. P/N 11-10627 .................. $199.00
Silver .................. P/N 11-09679 .................. $199.00

AVEO POSITAIL NANO
If your aircraft has an extremely thin and streamlined empennage, the PostTail Nano™ is the ultimate solution! As the world’s smallest position light assembly that meets all DO-160F and FAR requirements, this light will make your aircraft legal for night flying if your wing lights are not parallel to your aircraft centerline due to wingtip shapes. Green™ earth friendly aviation lighting series. It is a white position only light.

P/N 11-11552 .................. $432.00

AVEO STROBETAIL NANO STROBE
If your aircraft has an extremely thin and streamlined empennage, the StrobeTail Nano™ is the ultimate solution! As the world’s smallest position light assembly that meets all DO-160F and FAR requirements, this light will make your aircraft legal for night flying if your wing lights are not parallel to your aircraft centerline due to wingtip shapes. Green™ earth friendly aviation lighting.

P/N 11-11552 .................. $432.00

AVEO EXCELERON DAYLITE™ LANDING TAXI LED LIGHTS
For Experimental Use Only.
