EBC 406-SERIES ELT’S
All EBC 406 ELTs have a built-in self test feature that allows the pilot to check 406 power and the antenna- coaxial connection. Both cabin and tail mount ELTs use an external antenna. **Features:**
- Operating Freq: 406.025 MHz and 121.5 MHz
- Output Power on 406 MHz: 5W for 24 Hours at -20°C  Output Power on 121.5 MHz: 50mW min for 50 Hours at -20°C  Operating Temperature: -20°C to +5°C  Useful Battery Life: 5 Years or 1 Hour at -20°C 24 Hours at -20°C  Output Power on 121.5 MHz: Swept Tone 1600Hz to 300 Hz 2-4 Times/Second  Automatic Activation: Velocity Change of 4.5 feet per Second  Altitude: 50,000 feet  Decompression: 8000 feet to 40,000 feet  High Pressure: -15,000 feet  Humidity: 95% for 50 Hours  Shock Performance: Withstands 50G’s on 6 axes  Vibration: Withstands 10 G’s  Immersion: Withstands 24 hours in Salt Water  Warranty: 2 Years.

Made in the USA.

**KANNAD INTEGRA 406AF ELTS**
Weighing in at just 1.873lb and measuring just 3.90 x 3.40 inches the INTEGRA boasts a number of new and innovative features in a very small easy to install package. The INTEGRA transmits on both the international 406MHz satellite search and rescue system and on 121.5MHz for local direction finding. The minimum operating temperature of the unit is -20°C. The internal battery life of the INTEGRA is 6 years.

**KANNAD INTEGRA 406AF-H ELT FOR HELICOPTERS**
The new INTEGRA 406 ELT ELT is a major step forward in the development of ELT technology and aircraft safety equipment. The INTEGRA is the only ELT in the world which operates on the international 406MHz satellite search and rescue system and includes an internal GPS and 406MHz antenna, plus an internal battery. As a result of this technological breakthrough the INTEGRA offers the international flying community a number of major benefits over the standard ELT models available on the market today.

**KANNAD INTEGRA AP-H THREE FREQUENCY ELT FOR HELICOPTERS**

The Kannad Integra AP-H is the helicopter-specific version of the 3-frequency commercial aircraft portable McMurdo Kannad Integra AP. It is designed for fixed installation, but can be used as a portable by deploying the supplied portable battery pack. The McMurdo Kannad Integra AP-H has all the features of the compact plus GPS and internal 406MHz antenna. Sending a distress message with GPS coordinates enables rescuers to come directly to you, rather than search the area.

**KANNAD INTEGRA EASY ELT**
It is the world’s only ELT equipped with a 406 MHz back-up antenna, which enables the ELT to transmit the 406 MHz distress signal independently from the aircraft, in case the external antenna is broken or damaged. Its embedded GPS improves location accuracy to hundreds meters while avoiding the cost of a GPS interface installation. Save long-term costs with the Integra ELTs 10-year warranty, the longest warranty period in the industry.

Trusted partners such as Airbus, Embraer, Honda Jet, Cub Crafters, Robinson Helicopters and others rely on the Kannad Integra ELT. All aircraft.

Straight replacement for ARTEX RCPs to ensure easy installation.

**KANNAD INTEGRA ARINC E-NAV**
Provides a fail safe GPS data acquisition for the INTEGRA ELT system providing redundancy in the system with: 1) Integra internal GPS and 2) Aircraft Onboard GPS acquisition. Compatible with ARINC 429/743 database. Size 200"x100"x66mm for the overall ELT system.

**10 CONDUCTOR GRAY CODE TEFZEL WIRE**
Excellent for carrying emergency code information from an encoder to other devices that take gray code input.

Instead of running individual 24AWG wires and running them in a bundle, use this handy all in one, color coded, 10 conductor, cable. Sold in 1’ increments.

P/N 11-04479 ............ $5.40
