PN 13-14882 $124.75

STRUT CAMERA MOUNT FOR CESSNA

W3 Camera Mount by Cloudbase Engineering has been specifically designed to mount industry standard action cameras to the wingstrut on General Aviation aircraft.

W3 Cessna Strut Camera Mount with 9.25” long strap: $124.75

PN 13-14893

PN 13-14892

PN 13-14891

PN 12017 $119.95

FLIGHTCAM STRUT CLAMP MOUNT

Mount your GoPro, Garmin, or any action camera with a 3-finger (GoPro-style) mount or 1/4”x20 threaded socket to almost any aircraft strut in seconds. This strut clamp will fit anything from a small J-3 Cub to a Cessna Caravan. Quickly and securely attach your camera by adjusting the clamp to the size of your strut and securing it with the included UV-resistant polyurethane strap. This is not your normal rubber strap; We partnered with long-time outdoor equipment manufacturer, Voile, to produce an extremely tough rubber strap that will not degrade over time.

PN 11-11472 $119.95

NFLIGHTCAM COCKPIT KIT FOR DJI OSMO+

Note: DJI Osmo+ depicted not included. Cockpit kit only.
Capture amazing gyro-stabilized footage from the cockpit with your DJI Osmo+ and Nflightcam’s Cockpit Kit. This Nflightcam cockpit kit for the DJI Osmo+ includes the following: Variable Propeller Filter (ND2-ND400), Audio interface cable, 110mm Vacuum Suction Cup with Magic Arm Mount.

PN 11-15263 $1,245.00

REMOTE CAMERA SYSTEM

Mounts a traditional camcorder (i.e. Sony) • 360 degrees of rotation • 50 degrees of tilting ability • Optional stick grip with built in hat switch • Remote switch control • Weight - 7lbs • Dash mounted LCD screen to see what the camera is seeing • Vibration dampening built into mounting bracket.

PN 11-04320 $1,245.00

SCHIER CLAMP Gopro ADAPTER

The Schier Clamp (Patent Pending) is a new device that allows you to adjust the angle of your GoPro® in its mount and ensure that, once set, the camera does not move due to the effects of wind or minor bumps. No extra tools are required for installation or adjustment.

PN 13-19620 $19.95

FLYVIE PRO RECORDER

The Flight Recorder Pro is a patented and portable flight recorder. The unit captures and records high quality video from two small cameras, as well as GPS data and audio from internal and external communications in the cockpit. Captured imagery includes the pilot’s view and the instrument panel as well as the pilot’s manipulation of the flight controls. The data is saved to a small personal memory card which can then be downloaded and reviewed, analyzed and tagged over the Internet.

Package includes: Netbook, 2 - Webcams, GPS cable and accessories.
Features: Video record two views - both instrument panel and external horizon views, Audio record the cockpit and ATC communications, View your flight recording with GPS track overlaid on Google Earth, Share tagged segments of your flight with others - anytime, anywhere.

PN 10-04513 $1,795.00

ROCK STEADY UNIVERSAL WING STRUT MOUNT AND RUBBER STRAP

The Rock Steady GoPro style ball mount is the durable and versatile low profile design that you have been looking for. This quality all metal mount will not move, bend, or fail, unlike plastic mounts. The metal GoPro adapter is compatible with any GoPro style camera. This unique GoPro adapter allows over 180 degrees of adjustment unlike most GoPro fork tripod adapters. The knuckle clamp attaches to any Rock Steady camera dock with 360 degrees of adjustment. The knuckle locks your camera into any position with a hex wrench, or by hand with an included T-handle screw. Buy multiple Rock Steady bases to add numerous quick change mounting locations at an affordable price. Compatible with GoPro, Hero 2, Hero 3 & 3+, Hero 4, Hero 5 and Garmin Virb X and Virb XE or any Go Pro style camera. The Rock Steady Universal Strut Base is a quality all metal machined aluminum base. The strut base fits any size aircraft spreader bar, bi-plane strut, or wing strut from a J-3 to a Caravan. The simple clean design struts tightly to your wing strut without using bulky blocks or bolts. The Rubber Strap Kit uses a 19” universal rubber strap that fits most any strut. With adjustment holes every 1.25 inches, you simply start on a hole that gives you just enough strap to reach around the strut and tighten on the end. The temporary strap allows your camera mount to be quickly taken on and off any strut. FAA friendly temporary.
