DAVID CLARK HEADSETS

DAVID CLARK H10-66LX & H10-76LX
Plato, Inc. has trusted the green domes of David Clark Company's H10-76LX headsets for over 25 years. Their high-performance products are now equipped with several new features to enhance pilot comfort: soft, double-foam headpads, comfort-gel, 'undercut' ear seals, and a smaller, lighter battery pack with auto shutoff for ENC models. Find out for yourself why quality conscious pilots will accept nothing less than the #1 Headset in Aviation.

H10-66LX DUAL IMPEDANCE ENC HEADSET Designed for use with both high and low impedance systems. Select switch on dome matches headset to system impedance. Ideal for fleet operations. Certified Noise Reduction Rating (NRR): 27 dB. Built in ENC technology and enhanced comfort features. P/N 11-05427 $585.46

H10-76LX PORTABLE LOW IMPEDANCE ENC HEADSET Feature ENC technology and designed for use with low impedance systems. Coil cord with single plug connects the battery-powered module to aircraft radio. P/N 11-05428 $883.28

H10-76XP PANEL-MOUNT LOW IMPEDANCE ENC HEADSET Same as H10-76LX but with permanent panel-mount module for utilizing the aircraft's power source. P/N 11-05429 $789.57

H10-20 HEADSET 8 new headset design advances make the David Clark H10-20 a must see. The completely flexible boom assembly can be adjusted for perfect microphone placement. The M7A microphone is the most advanced noise-canceling amplified electret microphone available. Features a redesigned air-flow headband with liquid-filled ear seals for optimum comfort. Comes with volume control and a 5yr warranty. Made in the U.S. P/N H10-20 $370.14

Coiled Cord........P/N H10-21........$361.30
Helicopter..........P/N H10-26........$350.14

DAVID CLARK H10-30 HEADSET This dual headset, used by the Air Force, features foam filled ear cushions with an M-1/DC amplified dynamic noise cancelling mic. With 6 feet straight cord, PJ-056 telephone plug and PJ-068 mike. P/N H10-30............$279.00

DAVID CLARK H10-36 HEADSET The H10-36 headset features the M-1/DC dynamic mic and cord coil which extends to 5 ft., with U-174U plug for helicopter installations. P/N H10-36............$298.99

DAVID CLARK H10-60 HEADSET Features unique foam/air-flow headpad, low-pressure headband, Flo Fit Gel ear seals, and dual volume controls. Also features the M-7A advanced noise canceling amplified electret mic. Customize your H10-60 with 3-position headset pressure adjustment, boom guide lock, headband size adjustment, and cord selection. P/N H10-60.............. $385.25

DAVID CLARK H10-66 HEADSET A unique dual impedance headset for use in civilian and military style aircraft. The Model H10-66 features include new comfort gel, undercut ear seals, hinged wire boom with the M-101 amplified Dynamic microphone, and a Noise Reduction Rating (NRR) of 27 dB. P/N H10-66.............. $408.27

DAVID CLARK H20-10 HEADSET H20-10 headset features the Custom Comfort System which is a whole new concept in headset in comfort. Includes a headband suspension assembly that can be adjusted to a perfect comfort level, a pillow soft 'floating' headpad for maximum cushioning with no hot spots, and a larger contoured Flo-Fit gel ear seals which mold softly to your head. P/N H20-10.................... $361.30

DAVID CLARK 6AA BATTERY PACK Accepts 6 AA batteries. The protective cover keeps battery terminals from accidental contact with conducting surfaces while stored. Having a Spare Battery Cartridge, loaded and ready, will minimize time without electronic noise cancellation when batteries drain. P/N 11-02019...........$16.50

9V BATTERY PACK FOR ENHANCED HEADSETS This new XL-9V battery pack is easier to operate, wear and store. It is 50% smaller and 50% lighter than previous battery packs. It runs off a single 9V alkaline battery to provide power to the headset ENC system. The XL-9V features an Auto Shut Off function to save the battery if the power switch is left on when the headset is not in use. P/N 11-01783............ $102.85

DAVID CLARK UNDERCUT COMFORT-GEL EAR SEALS Ear Seals have redesigned to be softer, more supple and form fitting, with a unique ‘undercut’ shape that provides more room for your ears. This exclusive design makes for a larger, yet lighter ear seal. This new ear seal is now standard on the entire line of DC aviation headsets. New Ear Seal Features: • 26% lighter • 60% more surface area in contact with your head provides greater comfort by dissipation of necessary headband pressure • 30% more interior volume creates more room for your ear. P/N 11-01782.............$23.50

DAVID CLARK HEADSET BAG Series K Helmet Kit provides the ability to convert all David Clark Over-The-Head style (Except H20-10 & H10-80) headsets into a Helmet/Headset assembly.
