

AIRCRAFT SCALES – TEST EQUIPMENT

PRECISION AIRCRAFT SCALES FOR ACCURATE WEIGHT & BALANCE

Checks aircraft weight and balance after modifications or fitting of new accessories. Flight safety is improved by periodic weighing to verify weight and balance is within limits. Simply roll the aircraft up the ramps onto the scales or jack the wheels and slide the pads under tires. A single high performance strain gauge load cell is in each pad. Temperature compensation prevents zero shift or sensitivity changes. Weighing pads, indicator and cables are color coded for easy match up. Include one 3 channel indicator, three colored cables, one 110V battery charger cable, three ramps, and six tire stops. Also includes a case.

indicator and cables are color coded for easy match up. Include one 3 channel indicator, three colored cables, one 110V battery charger cable, three ramps, and six tire stops. Also includes a case.

Part No.	Capacity	Price
12-16711	2,500 lbs. per pad	\$6,560.00
12-16715	6,000 lbs. per pad	\$7,820.00
12-16721	10,000 lbs. per pad	\$8,826.00
12-16725	15,000 lbs. per pad	\$9,395.00

OPTIONS

Part No.	Description	Price
12-16730	Extra cable, colored	\$365.95
12-16735	Extra ramps, small, set of 3	\$298.95
12-16740	Extra ramps, large, set of 3	\$656.00
12-16745	Extra tire stops (chocks)	\$54.85
12-16750	220V Battery Charger Cable for overseas	\$541.00

AIRCRAFT WIRELESS WEIGHING KIT

The Aircraft Wireless Weighing Kit is the highly portable weighing device for small to medium sized aircraft. Ideal for obtaining weight from 3 points under the aircraft to properly determine CG ratios. Featuring standard capacities to 22,000 lbs (greater capacities available), this device will be a welcomed addition to your aircraft repair facility or regional airport.

Specifications: • Load Cell Model: WJSD-5000 • Wireless Range: 50 ft. • Capacities: 5 ton/sensor • Minimum Division: 1 kg • Maximum Tare: 4,000 kg • Built-In Rechargeable Battery • AC Adapter P/N 12-02608 \$3,805.00

SCALES 4 PLANES

2,000 lb scale measures 11-3/4" x 15-1/4" and is made of cast aluminum. The electronic display has been recessed into the top to keep it out of harms way. Your tire will be positioned parallel to the display to allow the readout to be clearly seen on the outboard side of the tire, or wheel pants. The scale top is powder coated gray. The coating makes cleanup quite easy because most everything will wipe right off. The units are not water proof. They should never be washed by hose or high pressure, but gentle hand cleaning should be all that is needed.

Model No.	Description	Part No.	Price
AWS-2K-STD	2K Per Wheel with built in display	12-03798	\$525.00
AWS-3K-STD	3k Per Wheel with built in display	12-03799	\$630.00
AWS-6K-REM	A set of 3-2k with remote diaplay	12-03801	\$1,465.00
AWS-8K-REM	A set with remote diaplay	12-03802	\$1,475.00
AWS-9K-REM	A set of 3-3k with remote diaplay	12-03803	\$1,595.00
AWS-15K-REM	A set of 3-5k with remote diaplay	12-03805	\$2,895.00
BS-002D	2K Smart Scale 11-3/4" x 15-1/4" Aluminum	12-04816	\$499.00
BS-004D	3K Smart Scale 11-3/4" x 15-1/4" Aluminum	12-04817	\$615.00

SMART SCALE CALIBRATOR

This calibration tool allows local scale companies to calibrate our smart bases. It also allows the scale operator to view any of the three bases, one at a time. When using this repeater, all scales receive their power from this unit. (A/C only) the Smart Bases require no additional power. This is a repeat of the reading that is displayed at each scale. When weighing large Tundra tires the display that is built-in is sometimes obscured. Includes Cables. Add LB/KG switching to your smart scales. Warranty 12 months. No calibration ever required.

P/N 12-04881 \$295.00

BARFIELD DIGITAL TURBINE TEMP TEST SET

The Barfield TT1200A is a Digital Turbine Temperature Test Set. It is microprocessor based, completely self-contained, battery powered unit housed in a high visibility ruggedized enclosure. It is designed with sufficient accuracies and range to be able to test digital and glass cockpit indicators with simple operation, direct reading, and multi-function versatility.

The TT1200A is specifically designed to accomplish all requirements for testing the aircraft Chromel/Alumel (K type) turbine temperature measuring systems. The Test Set can measure resistances down to 0.001 ohms, measure insulation up to 200M ohms, perform indicator run-outs with a resolution of 0.1°C or 1°C and a range of 1372°C. It can also display the equivalent °F or millivolts and may be used as a master indicator.

The TT1200A exceeds all of the operational capabilities of the popular Barfield TT1200A. P/N 11-13986 \$6,595.00

PRECISION TWEEZERS 8-95142-10454-5

12-04588

Perfectly aligned, hand-filed pointed tips plus a wide, comfortable patented non-slip grip for expert precision. Designed for Slice by famed architect Michael Graves. Measures approx. 86x20x9mm (20gm) - 3.5x0.75x0.35 in (0.7oz).

Tip Shape	Part No.	Price
Pointed Tip No Slip Grip	12-04588	\$19.99
Pointed Tip Stainless Steel	12-04589	\$19.99
Combo Slanted/Pointed Tip No Slip Grip	12-04590	\$19.95
Combo Slanted/Pointed Tip Stainless Steel	12-04591	\$19.95
Slanted Tip No Slip Grip	12-04586	\$19.99
Slanted Tip Stainless Steel	12-04587	\$19.99

WOOD HANDLE TOOTHBRUSH STYLE CLEANING BRUSH

Three rows of bristles by seven, your choice of materials, with bent wood handle approx 7 3/4 inches long. An especially popular welders tool, but very suitable for a variety of cleaning applications. Use stainless steel for maximum abrasive action, brass for less scratching. SW version stainless bristles are wire laced for positive retention.

P/N 04-02647 \$1.39

CLEANING TUBE BRUSH 3/16 X 6.25 INCHES

Tube brushes (also known as cylinder brushes) are filled with Dupont Tynex nylon and have excellent wear resistance. Although more susceptible to strong solvents than bristle filled brushes, nylon is stiffer, wears longer and cleans easier. This cylinder brush is perfect for manually cleaning internal surfaces such as tubes or threaded holes. Handle is made of twisted steel wire.

P/N 09-04587 \$1.50
