

TOW BARS – TUGS

ROBOTOW PORTABLE TOW BAR

All weather Robotow 24SL. It is lightweight (33 lbs.) and portable, making it ideal for carrying onboard your aircraft. When the Robotow's heavy duty all weather knurled drive drum is held against the nose wheel, the aircraft is easily moved. A trigger on the handle controls the speed while a switch reverses direction on command. Powerful, portable, and dependable, Robotow is an ideal motorized towbar for the aircraft listed below. Kits include Robotow, Battery, and Charger (US Charger or International Charger). Order axle adapters separately.

CESSNA TOWBAR EXTENSION

The "QUICK-FOLD COMPACT TOWBAR" also known as the "QFC--Towbar™". No more back breaking, bend over towing. Simply attach the QFC-Towbar™ extension to your already existent Cessna tow bar and stand up straight. An added extension of 33". Folds flat and is stowed securely along side the

factory tow bar.

P/N 13-06722.....\$89.00

POCKET TOW TAILWHEEL LEASH

Pocket tow makes tail wheel aircraft maneuvering easy. Made with one-inch heavy-duty nylon webbing, the lightweight tow bar alternative is small enough to fit in your pocket and works on tail wheel aircraft with a 360-degree full-swivel tail wheel assemblies. The small end loops around the tail wheel leaf spring and cinches up tightly to pull and steer the aircraft backwards without pushing or pulling on any flight surfaces.

Tailwheel leash - Black P/N 13-04681\$19.95

Tailwheel leash - Red..... P/N 13-04682.....\$19.95

GENERAL AVIATION TOWBAR

This aircraft tow bar attaches to tow vehicle, or you can move by hand with the convenient handles. Improved with powder coating. This tow bar has been used on the following aircraft: Cessna 150, 172, 182, 205, 210, Cirrus SR-22, Mooney M20, Vans RV-9A. Check your aircraft owner's manual, some aircraft manufacturers warn against towing with a bar attached to a vehicle. Make sure you do not exceed the tow limits of your aircraft

P/N 13-19787.....\$250.00

PIPER TOWBAR ADAPTER

Piper Adapter. This adapter fits any towbar with a 3/4" or larger hole. With this adapter you can move Piper 28 series aircraft with the attach holes approximately 4 inches apart.

BEECH TOWBAR ADAPTER

Beech Adapter. With this adapter you can move Beech Aircraft with the little tow pin. This adapter fits any towbar with a 3/4" or larger hole. Note: The grip length; (distance from nut to bolt head) is 1 1/2". With this adapter you can move Beech series aircraft with the small pin.

P/N 13-19793.....\$30.00

DELUXE TAILWHEEL TOWBAR

The new Deluxe Tail wheel Towbar uses a positive locking control cable to attach to the wheel from a straight-on position. No extra maneuvering or lifting is required, and it can be adjusted for various tail wheel sizes. Towbar Weight: 26 lbs.

Note: Maximum weight to lift is 1,200 to 1,500 lbs.
P/N 13-04918\$269.00

STEARMAN TOWBAR

This towbar easily captures your tailwheel. Just push down on the bar and latch the pental hook or drawbar ball. It makes moving the Stearman from the rear quick and easy. Made with heavy duty wheels and pump up tires. Powder coated black.

P/N 13-11618.....\$398.00

TAILWHEEL TRANSPORTER I TOW BAR

An almost effortless way to move your light tail wheel aircraft on the ground. A perfect match for Piper Cubs, Aeronca Champs or most any other light taildragger airplane. Requiring only 10.5 inches of ground clearance where the tail wheel spring is mounted to the fuselage, the Tailwheel Transporter attaches to your aircraft in just seconds and with only one movement of the Lifting Arm it lifts and locks the tail wheel. No modifications to your aircraft.
