NORAL FLIGHT BAGS

NORAL EXPRESS FLYER BAG
The swing hook for the adjustable shoulder strap is made of metal to ensure heavy load resistance. The shoulder strap has a soft rubber pad for your comfort and to keep the bag in fixed position while carrying on shoulder. Made of 1680 Denier Ballistic water repellent material. Its interior is fully padded and covered with the liner of water repellent taffeta.

NORAL TRIPLE HEADSET BAG
The Noral Triple Headset Bag is made of 1680 Denier Ballistic water repellent material. Its interior is fully padded and covered with the liner of water repellent taffeta.

NORAL FLYING CLUB BAG
This bag is designed for all pilots, especially for the compact cockpit airline pilot, military pilot and for private and student pilots. This bag can hold most essential instruments efficiently. The main compartment of this bag can hold a large headset, logbook and/or any other similar items. The rear pocket works well to hold books, boards, charts or similar items. There is also a small front pocket with zipper closure and two side pouches for Transceiver/GPS, etc. Made of 1680 Denier Ballistic water repellent material. Its interior is fully padded and covered with the liner of water repellent taffeta.

NORAL ATTACHE FLIGHT BAG
This bag has two side pouches for large headsets. One of these side pouches has a flap pocket with zipper closure to store pens, flashlights, ID card and/or license etc. Inside the main compartment there are two removable pouches for Transceiver and two dividers. The dividers can be adjusted to different positions and are removable. The front of the bag has a large open pocket for easy access. The back of the bag has a large zippered pocket with piano type opening, and three dividers. At the bottom floor of this bag is a removable plastic board to reinforce it and to keep the bag from sagging when fully loaded. Made of 1680 Denier Ballistic water repellent material. Its interior is fully padded and covered with the liner of water repellent taffeta.

NORAL IPILOT BAG
This bag can hold most instruments and is compact to save cockpit space. There are a total of 13 pockets inside and one large pocket outside for a headset. The main compartment of this bag can hold a large headset or other equipment. It has another zippered pocket in the front for smaller items. This bag also has some additional pockets.

NORAL AVIATOR FLIGHT BAG (DETACHABLE)
The main compartment of this bag has a removable divider which can be adjusted to different position. The bottom floor has a removable plastic board to reinforce. The swing hook for the adjustable shoulder strap is made of nylon to ensure heavy load resistance. The shoulder strap has a soft rubber pad for your comfort and to keep the bag in fixed position while carrying on shoulder. Made of 1680 Denier Ballistic water repellent material.
