Simply put, Oregon Aero® offers the most comfortable seat in the industry over as large an area of the seat surface as possible, preventing painful “hot spots.” Pilot and passengers fly in comfort—no matter how long the flight.

Oregon Aero® VK SmartCushion™ System shifts the hips, pelvis and back into a comfortable sitting position. At the same time, the seat cushions support occupants.

Oregon Aero® VK SmartCushion™ Systems for Experimental and Homebuilt aircraft offer maximum-comfort seating designed for your particular aircraft.

1 Inch Portable Universal SoftSeat® Cushion Systems

Shifting your hips, pelvis and back into the proper, pain-free position. Helps minimize lower back pain from prolonged sitting. Eliminates pain from “hot spots.” Can raise or move you forward. Zippered and interchangeable parts. 100% satisfaction guaranteed.

Two anchor options available: (1) Non-Skid Strips (most popular option) Two 1" wide x 10" long strips of black webbing with black non-skid rubber are hand sewn to the bottom of the cushion. (2) Straps - Best option if using Cushion Base for one purpose, such as in an aircraft. One-inch straps with adjustable buckle are hand sewn from side-to-side. Two hook and loop fasteners are hand sewn to the back.

1” Cushion is the most commonly used thickness. 1/2” Cushion is available for individuals with limited headroom. 2” Cushion available for individuals who need raised up. See www.aircraftspruce.com for additional sizes.
