POWERSONIC BATTERIES
Power Sonic sealed maintenance-free batteries allow safe, trouble-free operation in any position. You never need to add electrolyte; gases generated during over charge are recombined in a unique "oxygen cycle". Under normal operating conditions, 4 or 5 years of dependable service can be expected in standby applications, or between 200 and 1000 charge/discharge cycles, depending on depth of discharge. Temp. range: -76° to +140°F.

3-AMP BATTERY - Model: Powersonic PS-1230, PPS SKU: 35L116S1 Shipping Weight: 3 lbs, Dimensions: 9.22" x 2.64" x 2.36", Voltage: 12 Volts, Capacity: 3 Amp Hour(s), Chemistry: Lead.

P/N 11-03153 $29.95

P/N 11-03154 $73.75

P/N 11-03155 $102.75

ODYSSEY DRYCELL BATTERIES
Odyssey batteries, with eight year design life saves you time and money because you do not have to replace your battery as often. It is also the ONLY battery that is capable of delivering a large number of deep cycles - up to 400 when fully discharged or up to 500 when discharged to 80%. Odyssey battery will maintain up to 50% state of charge after 2 years if stored at room temperature (77°F). At temperatures lower than 77°F, storage times will be even longer. The cranking power of Odyssey batteries is double to triple that of equally sized conventional batteries, even when the temperature is as low as -40°F. 2 Year Warranty.

Note: MJ-Metal Jacket. See website for additional Specs.

AEROVOLTZ LITHIUM BATTERY
Aerovolt Lithium Iron Phosphate batteries are designed to replace the lead acid batteries that currently power most of the two and four cycle engines in Aviation. Features: • Up to 80% smaller than the stock battery • Up to 10 lbs. lighter than the stock battery • Designed, developed, and assembled in the USA • Completely ‘dry’ technology so batteries can be mounted in any direction • Non-toxic and recyclable • Impact and water resistant • No special charger required. *Visit our website for Safety Tips

Description  | Volts  | Part No.  | Price
-------------|--------|-----------|-------
AVG2-120     | 12     | 11-16402  | $148.75
AVO2-8-Cell  | 12     | 11-16403  | $188.75
AV012        | 12     | 11-16404  | $260.95
AVO2-16-Cell | 12     | 11-16405  | $351.00

AEROVOLTZ BALANCE CHARGER KIT
The only charger on the market designed specifically to work with the Aerovoltz battery. The primary advantage is the balance charging function. The Balance mode balances the voltage of each cell or cell pack while charging. By balancing charging your you insure that the battery is operating at its maximum power. Periodic balance charging can also double the expected life of your battery. This charger is not required to operate your Battery, but it is highly recommended.

120V .................................................. P/N 11-13081 $114.85
240V .................................................. P/N 11-13082 $116.75

ANTIGRAVITY 16 CELL SMALL CASE BATTERY
480 Cranking Amps. It is the smallest 16-Cell lithium battery made at only 4.5" Length x 3.25" Depth and 5.25" height (to the top of the terminals) ............... P/N 11-12104 $260.99

ANTIGRAVITY 20 CELL OEM YTX12-20 BATTERY
600 Cranking Amp and extremely compact size 5.8" Length x 3.4" Depth and 5.12" height (to the top of battery) ............... P/N 11-12105 $422.99

METAL JACKET (TRAY)
For Odyssey 680Amp battery
P/N 11-02234 $22.50

HOLD DOWN BRACKET FOR ODYSSEY 680AMP BATTERY
This hold down bracket for the Odyssey PC 680 battery can be easily mounted in any orientation. Color: Black
P/N 11-01853 ........................................ $38.75

YUASA BATTERY Y50-N18L-A-CX
The Yumicon CX generates more power, requires less maintenance, and lasts longer than any other conventional battery. Specifications: Battery Family: Yumicon CX, Battery Type: Y50-N18L-A-CX, Voltage: 12 Capacity: 20 Dimensions: 120mm x 76mm x 104mm Weight: 1.1 lbs. Metric Dimensions: 205mm x 90mm x 162mm Metric Weight: 1.5 kg, Acid Volume: 473.0z., Amps: 2 Electrolyte needed: 4.75 oz.

P/N 11-09496 ...................................... $108.95

YUASA BATTERY YB12C-A
YB12C-A YUASA Battery ships dry acid required. 12V, 5’d x 18’w x 14’h. Weight is 5.0 lbs.

P/N 11-07542 ....................................... $59.95

BATTERY TERMINAL TOOL
This unique tool is designed to provide positive tightening of battery terminals on all popular brands of lead/acid aircraft batteries without overtorquing and without the danger of an electrical short. The tool is made from steel for rugged service and is fully insulated with a rubber hand grip for protection against electrical shocks.

P/N 12-16200 ........................................ $1.95

BATTERY CORROSION GUARD
Battery Corrosion Guard forms a thin protective coating that will neutralize battery acid on all treated areas. It is an excellent way to clean the battery, hold down straps, and all metal parts you want to protect including cables, clamps, box, and posts. Excellent for aluminum battery box boxes. Widely used in the aircraft, truck, and boat industries.

3 oz. can ........................................... P/N 11-00310 $16.65
8 oz can ........................................... P/N 11-00320 $24.75
11 oz can .......................................... P/N 11-00615 $31.50

PULSYTECH POWERPULSE
PowerPulse is not a charger. It's a performance device designed to help batteries charge faster and provide maximum performance and power. Used extensively by the consumers and the U.S. Military worldwide for almost ten years. The PowerPulse system can also be used in an existing charging system. In fact, it will work even faster and stronger. This means batteries can be both charged and desulfated at the same time.
