SOLDERING SLEEVES

One-step, heat-shrinkable wire and cable interconnection
device. Create strong, soldered connections. Consist of
a heat-shrinkable sleeve and a premeasured, fluxed
solder band. When heated, the tubing shrinks and the
solder melts, making reliable, insulated terminations.

.200"MD P/N 11-04481 **\$0.73**
.300"LG P/N 11-04482 **\$1.42**

SOLDERING SLEEVES

Termination sleeves consist of a heat-shrinkable,
transparent, polyvinylidene fluoride sleeve with an inner,
pre-fluxed, solder preform and two thermoplastic sealing
inserts. When heat is applied, the solder melts and flows
to provide a superior connection between the ground lead
and the shield. At the same time, the two thermoplastic
sealing inserts melt and the outer sleeve shrinks to
provide an environmentally protected termination.
