## AEROX DILUTER DEMAND MASK

Comes standard with an electret microphone and an inflatable Quick Comfort head harness that provides maximum comfort. The mask features a carbon fiber construction, and soft silicon rubber. Connectors are available for most built in systems. This mask is easily mounted with the available carbon fiber stowage cup, aerox® is also able to manufacture a portable walk around system with the same outlet plug that is on your aircraft, so you can easily disconnect from the on-board system and plug directly into a portable system allowing mobility.

## PULSE OXIMETER CO DETECTOR 455

Designed for all aircraft with limited panel space. This small pulse Oximeter with CO Detector mounts easily in most panels and transmits data to the MFD'S via RS232. Current MFD manufacturers include Electronics International, Advanced Flight Technologies, Grand Rapids Instruments and on upcoming releases of Avidyne Entegra Release 9. The unit transmits the pilot's blood oxygen levels, heart rate statistics, CO Level, Cabin temperature and Cabin Altitude to the MFD's display units. The pilot inserts an index finger in the unit and quickly gets readouts so he/she can determine his/her general physical and his environmental condition. Aero-455 reminds the pilot when he/she passes 10K and every 30 minutes above 10K.

## ALT ALERT PERSONAL ALTITUDE MONITOR

Exclusively licensed from NASA under U.S. Patent 6,452,510, the Alt Alert™ will alarm when the cabin reaches an imminent and dangerously high cabin pressure-altitude (relative cabin pressure), based on FAA regulations. Once activated by installation of the battery (provided), the unit will enter "sleep mode" while at ground level, but will begin sampling pressure and battery voltage every 15 seconds during climb and while in level flight (consistent flying altitude) at altitudes above sea level. It will operate as such until the battery is drained or removed (usually about 18 months, unless alarm is activated). At any time, the battery status can be tested by pressing the "test" button. The AltAlert™ may be easily mounted on a flat surface in the cockpit or cabin of the aircraft, clipped to a visor, or worn where sound is not muffled by clothing.
