**FUEL HAWK FUEL GAUGES**

The Fuelhawk is just 11" long, clear lightweight and unbreakable. It’s easy to use and gives an instant readout in gallons usable. No more guessing. These handy devices answer the two very important questions: 1. How many gallons of usable fuel are remaining in the tank? 2. How much fuel can be added without going over gross weight? 3. Are the aircraft fuel gauges working & accurate?

**THE ORIGINAL FUEL STOP**

The Fuel Stop is a simple tool that snaps onto a standard straw fuel gauge and prevents the gauge from ever slipping into the tank. Works with Fuelhawk, or any other 1/2" diameter fuel gauge tube. It also becomes extremely handy when it’s necessary to set the gauge on the wing, as it will stay put and not roll off to disappear into the grass or onto the pavement. Shaped like a set of red pilot wings which makes finding the gauge a snap.
